HOPKINS SALES PARTNERS

University of New Orleans Press

Recently, we launched our brand-new website that unveiled our renewed Press vision, mission, and values. Allow us to reintroduce ourselves.

We at Hopkins Press envision a future where knowledge enriches the lives of every person. With that guiding principle, we set out to make it easier than ever to find big, bold ideas from the world's greatest thinkers. We've illuminated a diverse cast of changemakers across the humanities and STEM whose aim is to better the academy and society at large. Many have rooted their work in the principles of equity, justice, and inclusion.

If you are curious about joining Hopkins Press as an author, a staff member, or a partner, you'll see that we care deeply about honoring dignity. We have high expectations for ourselves and others, and we consistently work to ensure an environment centered on learning, caring, and job fulfillment. This commitment represents more than three years of staff-led collective discussion across our organization to implement a culture of inclusion and belongingness.

Johns Hopkins University Press, now also known as Hopkins Press, has been a powerhouse publisher for nearly a century and a half. With that foundation, we are constantly experimenting with novel ways to spark evidence-based discussions across all media on topics that matter. Beyond a fresh look to our website, we aspire to bring new functionality and dynamism to best support our community. Our authors, readers, editors, and clients count on us for credible, trusted scholarship and research that is imminently discoverable and available around the world. And every day, we deliver.

Together, we can build the future where knowledge actually does enrich the lives of every person. Join us in realizing this vision via the web, Twitter, Instagram, Facebook, and LinkedIn. And feel free to reach out to me directly at bkp@jhu.edu or on Twitter [@kline-pope](https://twitter.com/kline-pope).

Cheers,

Barbara Kline Pope

TRADE AND GENERAL INTEREST

THE BLACK FAMILY'S GUIDE TO COLLEGE ADMISSIONS

A Conversation about Education, Parenting, and Race

TIMOTHY L. FIELDS AND SHEREEM HERNDON-BROWN

Finding the right college is a challenge for all students. But Black families face additional challenges and questions while navigating the admissions process. In *The Black Family's Guide to College Admissions*, veteran admissions experts Timothy L. Fields and Shereem Herndon-Brown share provocative insights and demystify this complex process to answer important questions, from where to apply to how to get in.

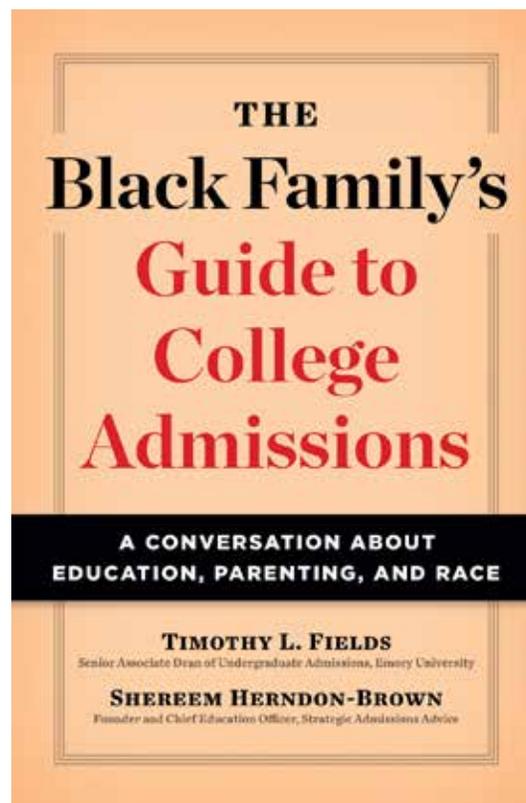

The ultimate guide to help Black families navigate the college admissions process.

Fields and Herndon-Brown discuss specific concerns for Black families that are not often addressed by school counselors or other resources. They highlight how the current social justice movement amplifies the distinct dynamics that exist between Historically Black Colleges and Universities and predominantly white institutions and which college choices may be best for Black students.

The Black Family's Guide to College Admissions is the definitive resource to begin the complex conversation about the choices that Black families face as they go through the college admissions process at the intersection of education, parenting, and race.

"A unique, refreshing, and much needed resource from two admissions insiders." —Rick Clark, Assistant Vice Provost/Executive Director of Undergraduate Admission, Georgia Institute of Technology, coauthor of *The Truth about College Admission*

TIMOTHY L. FIELDS (ATLANTA, GA) is a graduate of Morehouse College and the senior associate dean of undergraduate admissions at Emory University. **SHEREEM HERNDON-BROWN** (WASHINGTON, DC) is a graduate of Wesleyan University and the founder and chief education officer of Strategic Admissions Advice, an educational consulting company specializing in the creation of college counseling curriculum for charter schools and school districts, online essay courses, and personalized college advice coaching. The authors encourage you to join the conversation about education, parenting, and race at www.understandingthechoices.com.

CONSPIRACY

Why the Rational Believe the Irrational

MICHAEL SHERMER

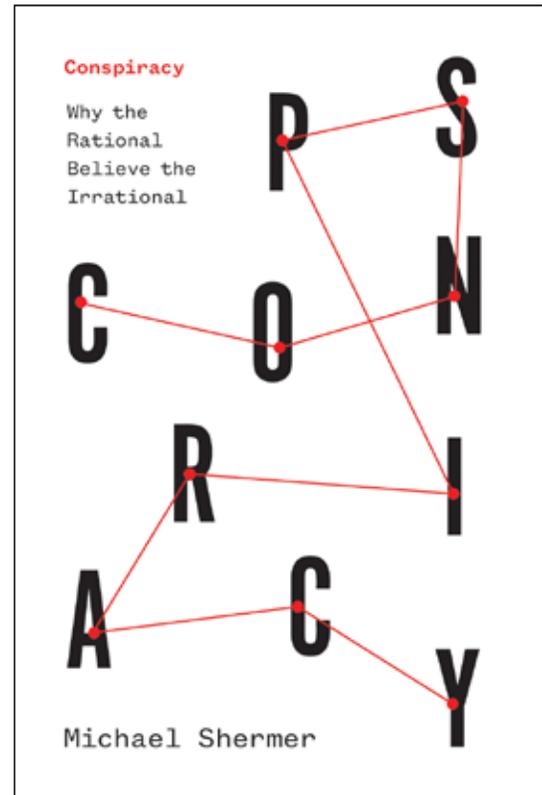

Long a fringe part of the American political landscape, conspiracy theories are now mainstream: 147 members of Congress voted in favor of objections to the 2020 presidential election based on an unproven theory about a rigged electoral process promoted by the mysterious group QAnon. But this is only the latest example in a long history of ideas that include the satanic panics of the 1980s, the New World Order and Vatican conspiracy theories, fears about fluoridated water, speculations about President John F. Kennedy's assassination, and the notions that the Sandy Hook massacre was a false flag operation and 9/11 was an inside job.

Best-selling author Michael Shermer presents **an overarching theory of conspiracy theories**—who believes them and why, which ones are real, and what we should do about them.

In *Conspiracy*, Michael Shermer presents an overarching review of conspiracy theories—who believes them and why, which ones are real, and what we should do about them. Trust in conspiracy theories, he writes, cuts across gender, age, race, income, education level, occupational status—and even political affiliation. One reason that people believe these conspiracies, Shermer argues, is that enough of them are real that we should be constructively conspiratorial: elections have been rigged (LBJ's 1948 Senate race); medical professionals have intentionally harmed patients in their care (Tuskegee); your government does lie to you (Watergate, Iran–Contra, and Afghanistan); and, tragically, some adults do conspire to sexually abuse children. But Shermer reveals that other factors are also in play: anxiety and a sense of loss of control play a role in conspiratorial cognition patterns, as do certain personality traits.

This engaging book will be an important read for anyone concerned about the future direction of American politics.

MICHAEL SHERMER (SANTA BARBARA, CA) is the publisher of *Skeptic* magazine, a Presidential Fellow at Chapman University, the host of the popular podcast *The Michael Shermer Show*, and the *Skeptic* Substack weekly columnist. He is the author of many New York Times–bestselling books, including *Why People Believe Weird Things: Pseudoscience, Superstition, and Other Confusions of Our Time*, *The Believing Brain: From Ghosts and Gods to Politics and Conspiracies—How We Construct Beliefs and Reinforce Them as Truths*, and *The Moral Arc: How Science Makes Us Better People*.

ROCK & ROLL IN KENNEDY'S AMERICA

A Cultural History of the Early 1960s

RICHARD AQUILA

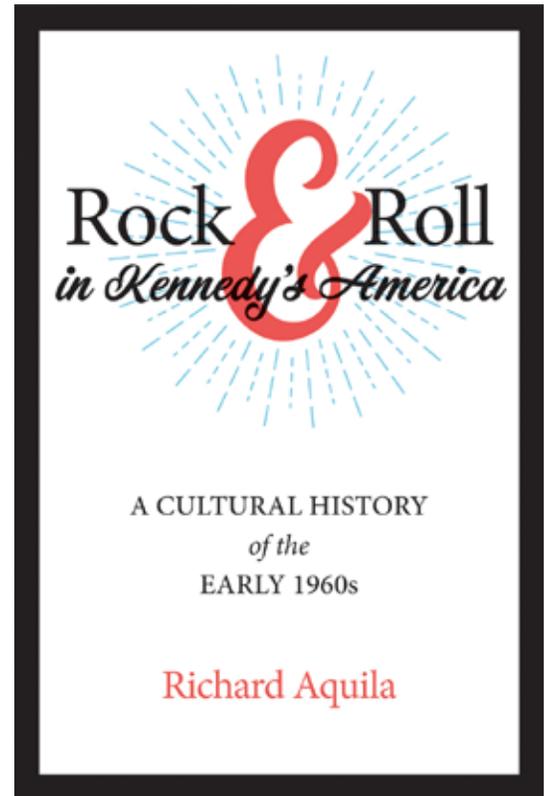

In the early 1960s, the nation was on track to fulfill its destiny in what was being called “the American Century.” Baby boomers and rock & roll shared the country’s optimism and energy. For “one brief, shining moment” in the early 1960s, both President John F. Kennedy and young people across the country were riding high. The dream of a New Frontier would soon give way, however, to a new reality involving assassinations, the Vietnam War, Cold War crises, the civil rights movement, a new feminist movement, and various culture wars.

From the former host of NPR’s *Rock & Roll America*, Richard Aquila’s *Rock & Roll in Kennedy’s America* offers an in-depth look at early 1960s rock & roll, as well as an unconventional history of Kennedy’s America through the lens of popular music. Based on extensive research and exclusive interviews with Dion, Bo Diddley, Brenda Lee, Martha Reeves, Pete Seeger, Bob Gaudio, Dick Clark, and other legendary figures, the book rejects the myth that Buddy Holly’s death in 1959 was “the day the music died.” It proves that rock & roll during the early 1960s was vibrant and in tune with the history and events of this colorful era. These interviews and Aquila’s research reveal unique insights and new details about politics, gender, race, ethnicity, youth culture, and everyday life. *Rock & Roll in Kennedy’s America* recalls an important chapter in rock & roll and American history.

A rousing, poignant look at the cultural history of rock & roll during the early 1960s.

“Well-written and a pleasure to read. *Rock & Roll in Kennedy’s America* helps define the contours of rock and roll music, which were ever-changing and influenced significantly by artists in rhythm and blues, soul, country music, mainstream pop, and many other genres. Aquila captures the variety and vitality of the music and provides excellent vignettes about the personalities and activities of the era. The oral histories he conducted with many figures from the era are especially vivid and welcome.” —Burton Peretti, author of *Lift Every Voice: The History of African American Music*

RICHARD AQUILA (BUFFALO, NY) is professor emeritus of history and American studies at Penn State University and the former host of NPR’s *Rock & Roll America*. He is the author of *The Sagebrush Trail: Western Movies and Twentieth-Century America* and *Let’s Rock! How 1950s America Created Elvis and the Rock & Roll Craze*.

FIRST AMONG MEN

George Washington and the Myth of American Masculinity

MAURIZIO VALSANIA

George Washington—hero of the French and Indian War, commander-in-chief of the Continental Army, and first president of the United States—died on December 14, 1799. The myth-making began immediately thereafter, and the Washington mythos crafted after his death remains largely intact. But what do we really know about Washington as an upper-class man?

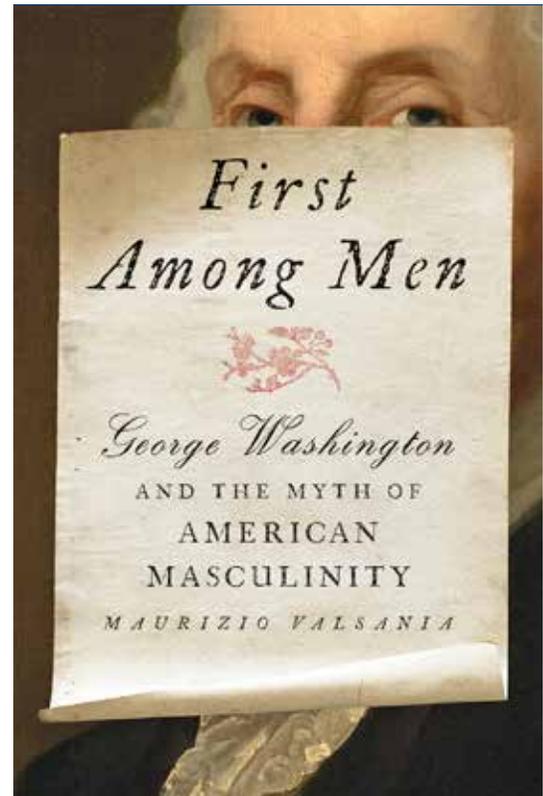

Washington is frequently portrayed by his biographers as America at its unflinching best: tall, shrewd, determined, resilient, stalwart, and tremendously effective in action. But this aggressive and muscular version of Washington is largely a creation of the nineteenth century. In *First Among Men: George Washington and the Myth of American Masculinity*, Maurizio Valsania considers Washington's complexity and apparent contradictions in three main areas: his physical life (often bloody, cold, injured, muddy, or otherwise unpleasant), his emotional world (sentimental, loving, and affectionate), and his social persona (carefully constructed and maintained). In each, he notes, the reality diverges from the legend quite drastically. Ultimately, Valsania challenges readers to reconsider what they think they know about Washington.

Dispelling common myths about the first US president and revealing the real George Washington.

Aided by new research, documents, and objects that have only recently come to light, *First Among Men* tells the fascinating story of a living and breathing person who loved, suffered, moved, gestured, dressed, ate, drank, and had sex in ways that may be surprising to many Americans. In this accessible, detailed narrative, Valsania presents a full, complete portrait of Washington as readers have rarely seen him before: as a man, a son, a father, and a friend.

“Using his unique perspective and skillset, Maurizio Valsania has cracked the marble shell that encases George Washington to reveal the real man—flesh and blood, passion and emotion, mind and body.”
—Douglas Bradburn, President/CEO, George Washington's Mount Vernon, coeditor of *Early Modern Virginia: Reconsidering the Old Dominion*

MAURIZIO VALSANIA (CHAPEL HILL, NC) is a professor of American history at the University of Turin. He is the author of *Jefferson's Body: A Corporeal Biography*.

THE BLACK BUTTERFLY- NEW IN PAPERBACK

The Harmful Politics of Race
and Space in America

LAWRENCE T. BROWN

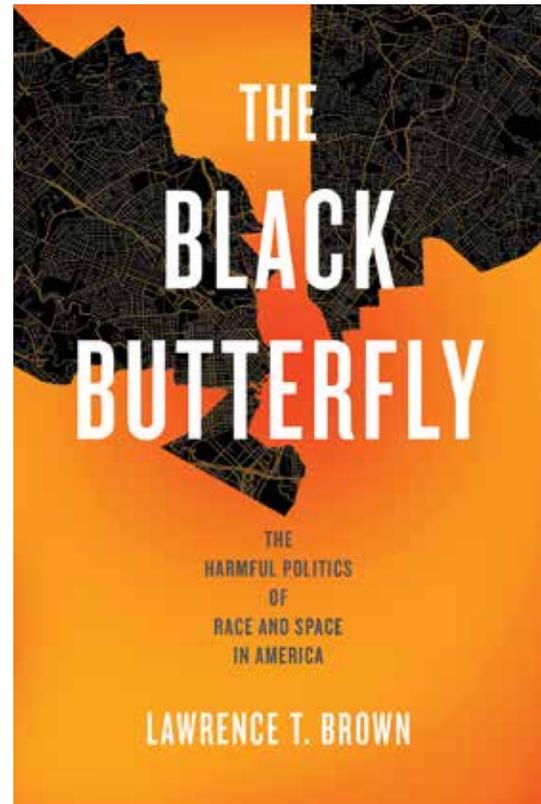

The world gasped in April 2015 as Baltimore erupted and Black Lives Matter activists, incensed by Freddie Gray's brutal death in police custody, shut down highways and marched on city streets. In *The Black Butterfly*—a reference to the fact that Baltimore's majority-Black population spreads out like a butterfly's wings on both sides of the coveted strip of real estate running down the center of the city—Lawrence T. Brown reveals that ongoing historical trauma caused by a combination of policies, practices, systems, and budgets is at the root of uprisings and crises in hypersegregated cities around the country.

The best-selling look at how **American cities can promote racial equity, end redlining, and reverse the damaging health- and wealth-related effects of segregation.**

Drawing on social science research, policy analysis, and archival materials, Brown reveals the long history of racial segregation's impact on health, from toxic pollution to police brutality. Beginning with an analysis of the current political moment, Brown delves into how Baltimore's history influenced actions in sister cities such as St. Louis and Cleveland, as well as Baltimore's adoption of increasingly oppressive techniques from cities such as Chicago.

Throughout the book, Brown offers a clear five-step plan for activists, nonprofits, and public officials to achieve racial equity. Persuasively arguing that, since urban apartheid was intentionally erected, it can be intentionally dismantled, *The Black Butterfly* demonstrates that America cannot reflect that Black lives matter until we see how Black neighborhoods matter.

LAWRENCE T. BROWN (BALTIMORE, MD) is an equity scientist, urban Afrofuturist, and the director of the Black Butterfly Academy, a racial equity education and consulting firm. In June 2018, he was honored by Open Society Institute-Baltimore with the Bold Thinker award for sparking critical discourse regarding Baltimore's racial segregation. He is currently a research scientist in the new Center for Urban Health Equity at Morgan State University, where he is leading the Black Butterfly Rising Initiative.

THE CONTAGION OF LIBERTY

The Politics of Smallpox in the American Revolution

ANDREW M. WEHRMAN

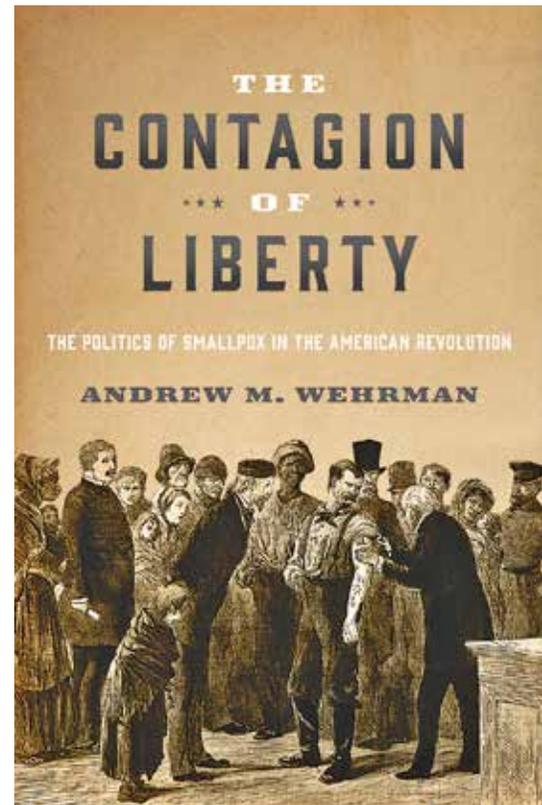

The Revolutionary War broke out during a smallpox epidemic, and in response, General George Washington ordered the inoculation of the Continental Army. But Washington did not have to convince fearful colonists to protect themselves against smallpox—they were the ones demanding it. In *The Contagion of Liberty*, Andrew M. Wehrman describes a revolution within a revolution, where the violent insistence for freedom from disease ultimately helped American colonists achieve independence from Great Britain.

Inoculation, a shocking procedure introduced to America by an enslaved African, became the most sought-after medical procedure of the eighteenth century. The difficulty lay in providing it to all Americans and not just the fortunate few. Across the colonies, poor Americans rioted for equal access to medicine, while cities and towns shut down for quarantines. In Marblehead, Massachusetts, sailors burned down an expensive private hospital just weeks after the Boston Tea Party.

A timely and fascinating account of the raucous public demand for smallpox inoculation during the American Revolution and the origin of vaccination in the United States.

This thought-provoking history offers a new dimension to our understanding of both the American Revolution and the origins of public health in the United States.

ANDREW M. WEHRMAN is an associate professor of history at Central Michigan University. A winner of the Walter Muir Whitehill Prize in Early American History, his writing has appeared in *The New England Quarterly*, *The Boston Globe*, and *The Washington Post*.

BUILDING BREAKTHROUGHS

On the Frontier of Medical Innovation

RAJU PRASAD

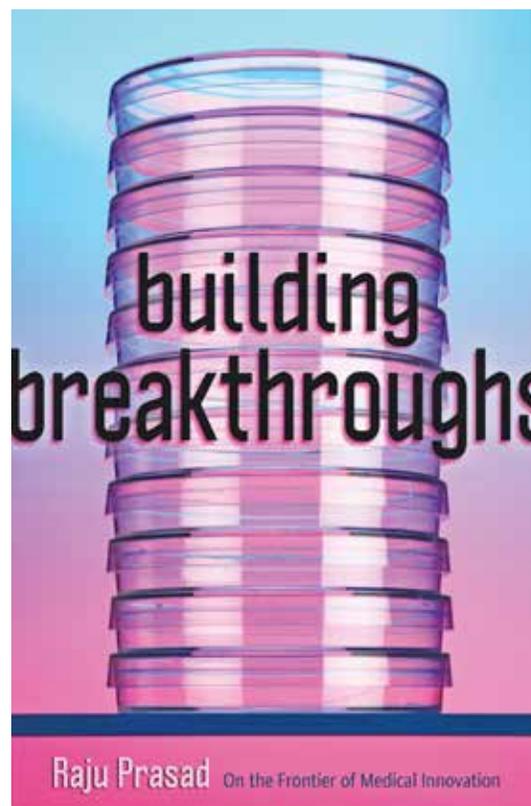

In *Building Breakthroughs*, Raju Prasad tells the story of important advancements in biotechnology and medical innovation from gene therapies to mRNA vaccines, providing historical context and examining cutting-edge research. Based on in-depth interviews with both the scientists who developed these discoveries and the patients who have benefited from them, *Building Breakthroughs* reveals the key players behind drug development and the inner workings of this essential business.

From mRNA vaccines to gene therapies, the next frontier of medical innovation is here.

Through stories of patients and their families, and of the researchers creating new treatments, Prasad reveals how cell therapies are advancing to treat childhood leukemia and a form of lymphoma, how a gene therapy was established to treat the rare disease spinal muscular atrophy type 1, and how potentially curative therapies that are being developed for sickle cell disease. By examining the clinical trial and regulatory paths each therapy took to reach approval, Prasad uncovers the building blocks of biotechnology innovation and the investments that must be made to catalyze the development of future breakthroughs. He also explores issues of scientific communication and misinformation, providing recommendations for improvements in the future.

“Prasad has woven together a book that is rich in detail and brings to life compelling stories about both patients and the medicines that have helped them”—Rohit Khanna, author of *Misunderstanding Health: Making Sense of America’s Broken Health Care System* Introduction

RAJU PRASAD, PhD (CHICAGO, IL), is a partner and biotechnology analyst at William Blair, focusing on cell therapy, gene therapy, and gene editing. Dr. Prasad previously worked as a research associate with the University of North Carolina at Chapel Hill’s Gillings School of Global Public Health and as an independent consultant with the US Environmental Protection Agency.

WE'LL FIGHT IT OUT HERE

A History of the Ongoing Struggle
for Health Equity

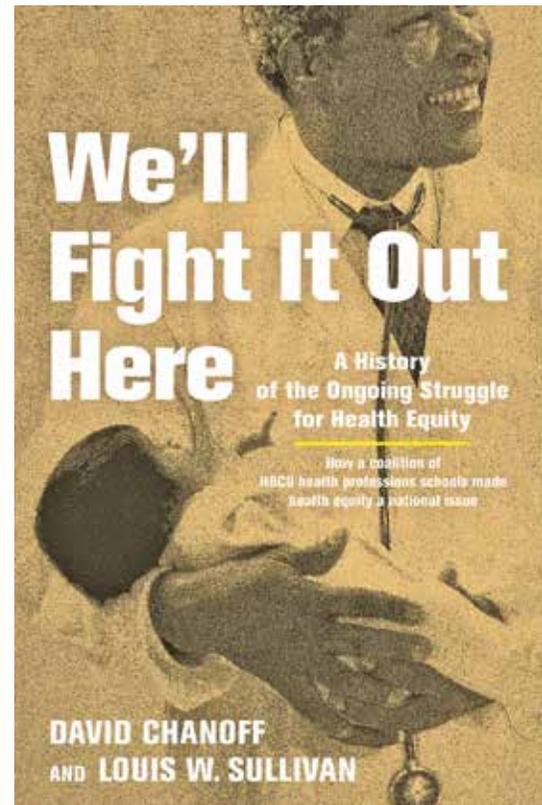

DAVID CHANOFF AND LOUIS W. SULLIVAN

Racism in the US health care system has been deliberately undermining Black health care professionals and exacerbating health disparities among Black Americans for centuries. These health disparities only became a mainstream issue on the agenda of US health leaders and policymakers because a group of health professions schools at Historically Black Colleges and Universities banded together to fight for health equity. *We'll Fight It Out Here* tells the story of how the Association of Minority Health Professions Schools (AMHPS) was founded by this coalition and the hard-won influence it built in American politics and health care. David Chanoff and Louis W. Sullivan, former secretary of health and human services, detail how the struggle for equity has been fought in the field of health care, where bias and disparities continue to be volatile national issues.

How a coalition of HBCU health professions schools made health equity a national issue.

Chanoff and Sullivan outline the history of Black health care, from pre-Emancipation to today, centering on the work of AMHPS, which brought to light health care inequities in 1983 and precipitated virtually all minority health care legislation since then. The work of this coalition of Black health schools continues, both in supporting the training of more doctors and health professionals from minority backgrounds and in advancing issues related to health equity.

DAVID CHANOFF (SOMERVILLE, MA) is the coauthor of more than twenty books, including *Seeing Patients: Unconscious Bias in Health Care*, and has written for the *New York Times Magazine*, the *Wall Street Journal*, and more. **LOUIS W. SULLIVAN** (ATLANTA, GA) is a former secretary of health and human services and the founding dean and president emeritus of Morehouse School of Medicine.

NORMAN COUSINS

Peacemaker in the Atomic Age

ALLEN PIETROBON

Johns Hopkins Nuclear History and Contemporary Affairs

As the editor of the *Saturday Review* for more than thirty years, Norman Cousins had a powerful platform from which to help shape American public debate during the height of the Cold War. Under Cousins's leadership, the magazine was considered one of the most influential in the literary world. Cousins's progressive, nonpartisan editorials in the *Review* earned him the respect of the public and US government officials. But his deep impact on post-war international humanitarian aid, anti-nuclear advocacy, and Cold War diplomacy has been largely unexplored.

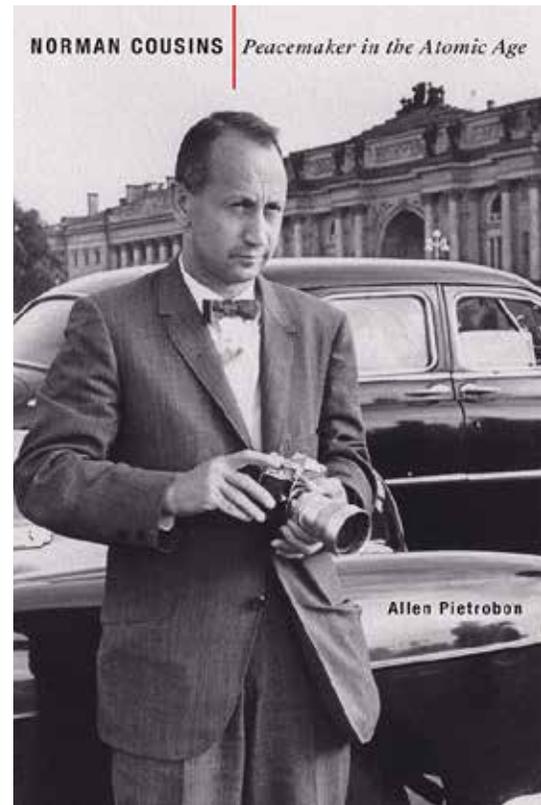

Influencing US presidents and public opinion, the American journalist Norman Cousins had an incredible but overlooked diplomatic impact during the Cold War.

In this book, Allen Pietrobon presents the first true biography of Norman Cousins. Cousins was much more important than we realize: he was involved in several secret citizen diplomacy missions during the height of the Cold War and, acting as a private citizen, played a major role in getting the Limited Test Ban Treaty signed. He also wrote JFK's famous 1963 American University commencement speech ("not merely peace in our time but peace for all time").

This book is a fascinating look at the outsized impact that one individual had on the course of American public debate, international humanitarianism, and the Cold War itself. This biography of the vocal anti-communist and anti-nuclear activist's public life will interest readers across the ideological spectrum.

"Pietrobon shines light on the extraordinary life of Norman Cousins, an activist, journalist, philosopher, and private citizen who, over the course of nearly five decades, conducted quiet 'citizen' diplomacy when political elites were unable or unwilling to engage on difficult issues." —Susan McCall Perlman, National Intelligence University

ALLEN PIETROBON (SILVER SPRING, MD) is an assistant professor of global affairs at Trinity Washington University.

A FIELD GUIDE TO COASTAL FISHES OF BERMUDA, BAHAMAS, AND THE CARIBBEAN SEA

VAL KELLS, LUIZ A. ROCHA, AND CAROLE C. BALDWIN

Capturing the remarkable diversity of fishes from estuaries, mangrove nurseries, coralline and rocky reefs to well offshore, this fully illustrated guide to the subtropical coast of Bermuda, the tropical waters of the Bahamas, and the entire Caribbean Sea is the most comprehensive guide of its kind. The combined work of award-winning marine science illustrator Val Kells and distinguished ichthyologists Luiz A. Rocha and Carole C. Baldwin, *A Field Guide to Coastal Fishes of Bermuda, Bahamas, and the Caribbean Sea* is the region's newest and most thorough fish identification guide available.

The most comprehensive and beautifully illustrated guide to the coastal fishes of Bermuda, Bahamas, and the Caribbean Sea.

Key features include:

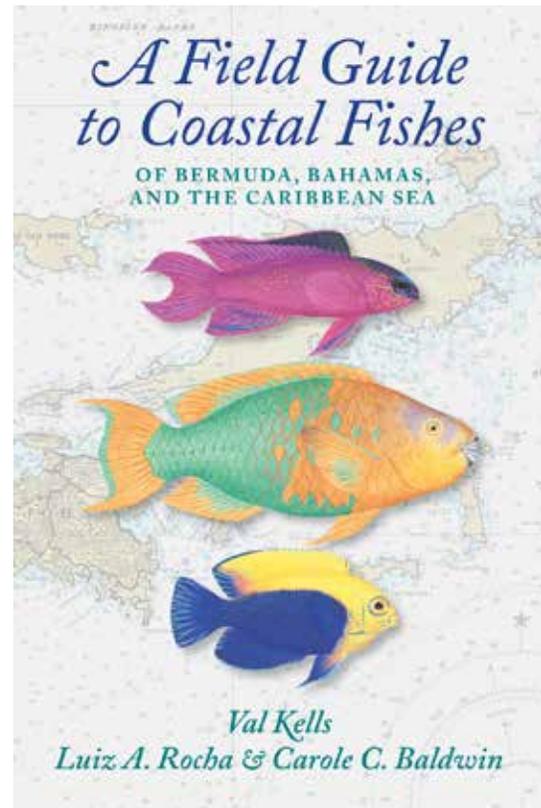

- Over 1,470 illustrations of adults, juveniles, and other color variants
- Descriptions of 161 fish families and around 1,300 species
- Concise details about the features, range, and biology of each species

This guide is your go-to reference for fish identification on your boat, in your travel case, or on your bookshelf.

"The best field guide to the region and the only one containing all of the newly described species and current taxonomy. Combining Kell's outstanding illustrations with the expertise of both Baldwin and Rocha, who have spent decades studying the fishes of this region, this is an excellent book for amateur enthusiasts, anglers, teachers, aquarium hobbyists, and scientists."

—James L. Van Tassell, American Museum of Natural History, coeditor of *The Biology of Gobies*

VAL KELLS (KILL DEVIL HILLS, NC) is an award-winning marine science illustrator. She is the coauthor and illustrator of *A Field Guide to Coastal Fishes: From Maine to Texas* and *A Field Guide to Coastal Fishes: From Alaska to California*. **LUIZ A. ROCHA** (GREENBRAE, CA) is a curator and Follett Chair of Ichthyology at the California Academy of Sciences and the coauthor of *A Field Guide to Coastal Fishes: From Alaska to California*. **CAROLE C. BALDWIN** (ARLINGTON, VA) is a curator and chair of vertebrate zoology at the Smithsonian Institution's National Museum of Natural History. She is the coauthor of *One Fish, Two Fish, Crawfish, Bluefish: The Smithsonian Sustainable Seafood Cookbook*.

AIA GUIDE TO THE ARCHITECTURE OF WASHINGTON, DC

(sixth edition)

G. MARTIN MOELLER, JR.

This lively and informative guide offers tourists, residents, and architecture aficionados insights into nearly 450 of Washington, DC's, most noteworthy buildings and monuments. Organized into 19 discrete walking tours, plus one general tour of peripheral sites, this thoroughly revised sixth edition features projects ranging from early federal landmarks to twenty-first-century commercial, institutional, and residential buildings. It includes some 80 new entries covering dozens of recently completed buildings, along with some historic structures that may have been overlooked in the past. The guide also has updated maps, and many existing entries have been rewritten to reflect recent renovations, changes to the buildings' contexts, or additional scholarship.

“The model of what a concise, attractive guidebook should be.”—*Mid-Atlantic Country*

G. Martin Moeller, Jr., blends informed, concise descriptions with engaging commentary on each landmark, revealing surprising details of the buildings' history and design. Every entry is accompanied by a photograph and includes the structure's location, its architects and designers, and the corresponding dates of completion. Each entry is keyed to an easy-to-read map at the beginning of the tour.

From the imposing monuments of Capitol Hill and the Mall to the pastoral suburban enclaves of Foxhall and Cleveland Park, from small memorials to vast commercial and institutional complexes, this guide shows us a Washington that is at once excitingly fresh and comfortably familiar. The additions and revisions incorporated into the latest edition illuminate broader demographic and physical changes in the city, including the emergence of new neighborhoods and the redevelopment of once-neglected areas.

G. MARTIN MOELLER, JR. (WASHINGTON, DC), is an independent curator and writer and the editor of *ArchitectureDC*. He is the author of *The Favrot Family of Louisiana: A History over Three Centuries* and the coeditor of *Liquid Stone: New Architecture in Concrete*.

CAN WE TRUST AI?

RAMA CHELLAPPA, PhD, WITH ERIC NIILER

Johns Hopkins Wavelengths

Artificial intelligence (AI) has evolved from an experimental computer algorithm used by academic researchers to a reliable method of sifting through large sets of data to detect patterns not readily apparent through more rudimentary search tools. But as AI applications grow, concerns have increased, too, including worries about applications that amplify existing biases in business practices and about the safety of self-driving vehicles.

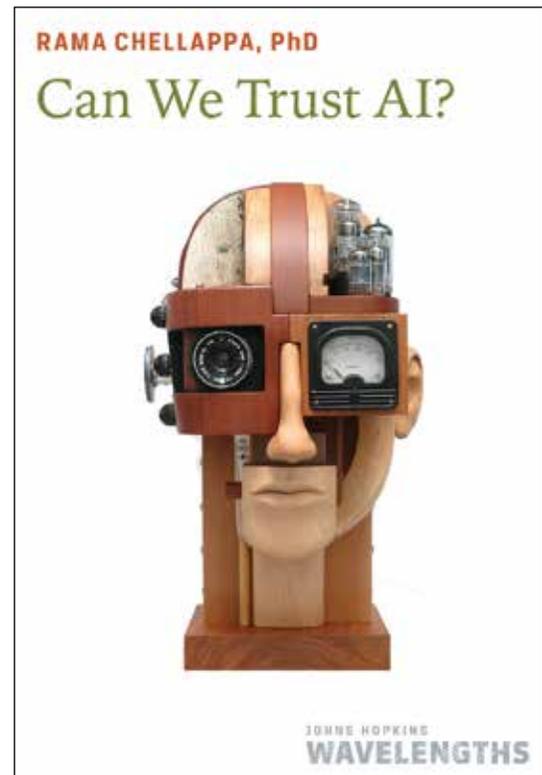

Artificial intelligence is part of our daily lives. How can we address its limitations and guide its use for the benefit of communities worldwide?

In *Can We Trust AI?*, Dr. Rama Chellappa, a researcher and innovator with 40 years in the field, recounts the evolution of AI, its current uses, and how it will drive industries and shape lives in the future. Leading AI researchers, thought leaders, and entrepreneurs contribute their expertise as well on how AI works, what we can expect from it, and how it can be harnessed to make our lives not only safer and more convenient but also more equitable.

The book features

- an exploration of AI's origins during the post-World War II era through the computer revolution of the 1960s and 1970s, and its explosion among technology firms since 2012;
- highlights of innovative ways that AI can diagnose medical conditions more quickly and accurately;
- explanations of how the combination of AI and robotics is changing how we drive; and
- interviews with leading AI researchers who are pushing the boundaries of AI for the world's benefit and working to make its applications safer and more just.

RAMA CHELLAPPA, PhD (POTOMAC, MD) is a leading researcher and inventor in the fields of computer vision, artificial intelligence, and machine learning. A Bloomberg Distinguished Professor in electrical, computer, and biomedical engineering, he is also the chief scientist at the Johns Hopkins Institute for Assured Autonomy and a member of Johns Hopkins's Mathematical Institute for Data Science, Center for Imaging Science, its Center for Language and Signal Processing, and its Malone Center for Engineering in Healthcare. **ERIC NIILER (CHEVY CHASE, MD)** is a contributing writer for *WIRED* and an adjunct faculty member in the Johns Hopkins University Graduate Program in Science Writing. His work has appeared in *National Geographic*, *The Wall Street Journal*, *The Washington Post*, *Scientific American*, and BBC/PRI's *The World*.

HAPPINESS

CHRISTIAN BJØRNSKOV

A short but engaging look at **how the key to our own happiness may lie with other people.**

Why is Denmark consistently ranked one of the happiest nations? In *Happiness*, researcher Christian Bjørnskov explores what we mean when we talk about happiness. By evaluating studies and theories on happiness that test how family, genetics, religion, wealth, work, and trust factor into our happiness as well as how often we smile or compare ourselves to others, Bjørnskov outlines why our most important source of happiness may be the people around us.

CHRISTIAN BJØRNSKOV (AARHUS, DK) is a professor of economics at Aarhus University and a researcher at the Research Institute of Industrial Economics in Stockholm.

Reflections In Reflections, a series copublished with Denmark's Aarhus University Press, scholars deliver 60-page reflections on a key concept that encapsulates their years of study and research. These books present unique insights on a wide range of topics and concepts—everything from love, trust, and play, to corruption, welfare, and sleep—that entertain and enlighten readers with exciting discoveries and new perspectives.

DEMOCRACY

SVEND-ERIK SKAANING

A short but engaging look at **democracy: what it is, how it compares to other forms of rule, and why it makes a difference.**

What is democracy? And even if it can be defined, can true democracy ever be achieved? Without a definition, dictators can pose as democrats, and the oppressed can see despotism as the answer to their prayers. But true democracy, author Svend-Erik Skaaning argues, will not automatically solve the world's problems. It is contentious and unfair, even as it keeps tyrants at bay.

SVEND-ERIK SKAANING (AARHUS, DK) is a professor in the Department of Social Science at Aarhus University.

CORRUPTION

METTE FRISK JENSEN

A short but engaging look at **what makes Denmark one of the least corrupt countries in the world.**

Corruption is a profoundly destructive force around the world, but why does its extent vary so drastically among countries? In *Corruption*, Mette Frisk Jensen closely links the level of corruption in a country to its wealth, the happiness of its citizens, and the level of trust citizens have in their government.

METTE FRISK (AARHUS, DK) is the head of the Danish history website danmarks historien.dk in the Department of Culture and Society at Aarhus University.

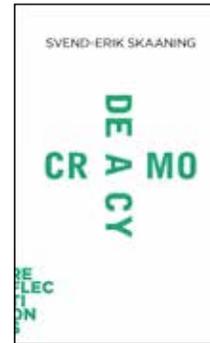

PLAY

MARC MALMDORF ANDERSEN

A short but engaging look **at why play is so important for people of all ages and how it can help us become better, more creative adults.**

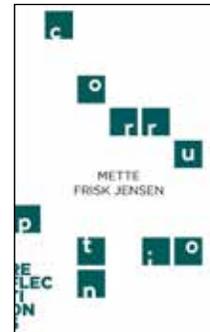

In *Play*, Marc Malmdorf Andersen argues that playing is not just for kids and the young at heart. He explains how it is something of a scientific process, and how tinkering with one hare-brained idea after another can help us become better, more creative adults. When we play, we develop trust and intimacy, solve problems, and explore our own minds and the world around us.

MARC MALMDORF ANDERSEN (AARHUS, DK) is a postdoc in the Department of Culture and Society at Aarhus University.

SEIZURES AND EPILEPSY IN CHILDREN

A Comprehensive Guide (fourth edition)

EILEEN P. G. VINING, MD, SARAH C. DOERRER, MS, CPNP, CHRISTA W. HABELA, MD, PhD, ADAM L. HARTMAN, MD, SARAH A. KELLEY, MD, ERIC H. KOSSOFF, MD, CYNTHIA F. SALORIO, PhD, SAMATA SINGHI, MD, MSc, AND CARL E. STAFSTROM, MD, PhD

A Johns Hopkins Press Health Book

The most comprehensive and practical guide available for caregivers of children who have seizures and epilepsy, now completely updated.

No child's life should be defined by seizures. For more than 30 years, parents, caregivers, patients, and health care providers have trusted *Seizures and Epilepsy in Children* to provide comprehensive, science-based information, and practical answers to the most common questions about these conditions. In this new edition, completely revised and updated, a team of experts from one of the leading medical centers in the world offers guidance on:

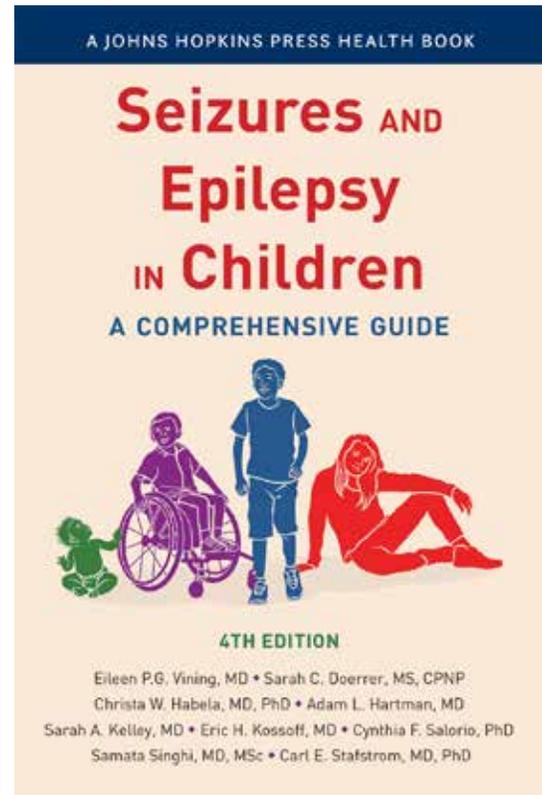

- diagnostic testing and the latest treatments
- recommendations for the best devices, apps, and websites
- driving, health insurance, and playing sports
- navigating school and other environments
- mental health issues and counseling
- coping with disability
- side effects from medications

This new edition also features dedicated chapters on diet, complementary and alternative medicine, and rescue medicines. *Seizures and Epilepsy in Children* is the go-to resource for caregivers and families with children who have epilepsy and seizures.

"An excellent resource for families."

—Sudha K. Kessler, MD, MSCE, Program Director, Pediatric Epilepsy Fellowship, Children's Hospital of Philadelphia

EILEEN P. G. VINING, MD (BALTIMORE, MD) is a professor of neurology and the former director of Pediatric Neurology at the John M. Freeman Pediatric Epilepsy Center at Johns Hopkins Medicine. **DR. THE CONCISE GUIDE TO BIPOLAR DISORDER

FRANCIS MARK MONDIMORE, MD

A Johns Hopkins Press Health Book

When a diagnosis of bipolar disorder enters your life, you may not be sure where to turn for accurate information about this potentially devastating but treatable illness. Whether you yourself have been diagnosed, or a spouse, parent, child, friend, or employee has developed the illness, the need for information and advice is acute.

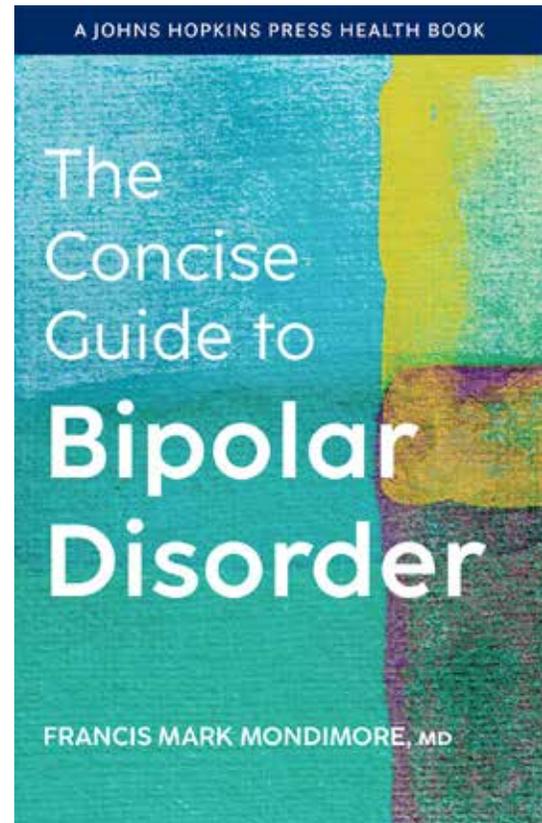

A concise, essential guide to living with bipolar disorder by an internationally known expert.

Presenting the essentials of diagnosis and treatment clearly and succinctly, leading psychiatrist Dr. Francis Mark Mondimore distills everything you need to know about bipolar disorder in this new indispensable guide. In down-to-earth language, Dr. Mondimore explains what bipolar disorder is and how you (or your loved one) can live your best life with the help of medications, therapy, the support of family and friends, and medical care.

An extensive list of references is included, along with additional suggested reading materials and online resources.

“Very thorough. *The Concise Guide to Bipolar Disorder* provides the information that people with bipolar disorder, friends and family, primary care providers, family doctors, and nurse practitioners need.” —Thomas Miller, MD, Southern Illinois University School of Medicine

FRANCIS MARK MONDIMORE, MD (NORTH BEACH, MD), is a retired associate professor of psychiatry and behavioral sciences at Johns Hopkins University School of Medicine and the founding director of the Mood Disorders Clinic at the Hopkins Bayview Medical Center. He is the author or coauthor of five books on mental health issues, including *Bipolar Disorder: A Guide for You and Your Loved Ones*, *Adolescent Depression: A Guide for Parents*, and *Borderline Personality Disorder: New Reasons for Hope*.

HONEST AGING

An Insider's Guide to the Second Half of Life

ROSANNE M. LEIPZIG, MD, PhD

A Johns Hopkins Press Health Book

From Dr. Rosanne M. Leipzig, a top doctor with more than 35 years of experience caring for older people, *Honest Aging* is an indispensable guide to the second half of life, describing what to expect physically, psychologically, functionally, and emotionally as you age.

Your indispensable guide to taking charge of the second half of your life.

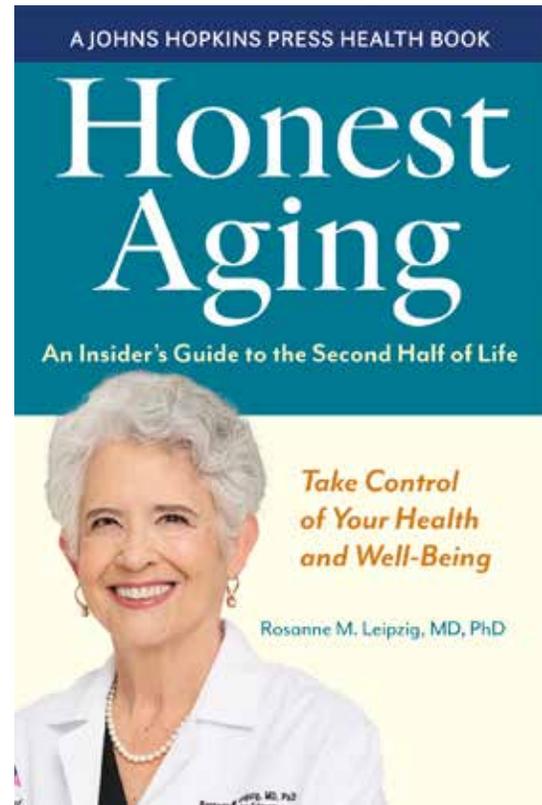

Leipzig, an expert in evidence-based geriatrics, highlights how 80-year-olds differ from 60-year-olds and why knowing this is important for your health. With candor, humor, and empathy, this book will provide you with the knowledge and practical advice to optimize aging. The book helps you recognize age-related changes in your body and mind and understand what's typical with aging and what's not;

- offers guidance for common health concerns, including problems with memory, energy, mood, sleep, incontinence, mobility and falls, hearing and vision, aches and pains, gastrointestinal problems, weight, and sex;
- shares advice on how to make decisions about health care, driving, and where to live;
- includes helpful checklists and lists of medications to prepare for doctor and hospital visits;
- recommends the best technology options, such as mobility devices, emergency device systems, and more;

Enriched by illustrations, patient stories, and deep dives into science and the latest research, *Honest Aging* gives you the tools to take control of your health and well-being as you age.

"This book is excellent, and I would recommend it to my patients. It includes all of the things related to aging in one place." —Ciandra Dsouza, MD, MPH, University of Rochester School of Medicine and Dentistry

ROSANNE M. LEIPZIG, MD, PhD (NEW YORK, NY), is the Gerald and May Ellen Ritter Professor and Vice Chair Emeritus for the Brookdale Department of Geriatrics and Palliative Medicine at the Icahn School of Medicine at Mount Sinai. She is the editor-in-chief of the monthly newsletter *Focus on Healthy Aging* and coeditor of the fourth edition of *Geriatric Medicine*

RECONNECTING AFTER ISOLATION

Coping with Anxiety, Depression, Grief, PTSD, and More

SUSAN J. NOONAN, MD, MPH

A Johns Hopkins Press Health Book

In *Reconnecting after Isolation*, Dr. Susan J. Noonan draws on our collective experience of the COVID-19 pandemic to help readers deal with the emotional impact of social isolation. Speaking as both a provider and recipient of mental health care services, Noonan combines her professional and personal experiences in an evidence-based and practical guide.

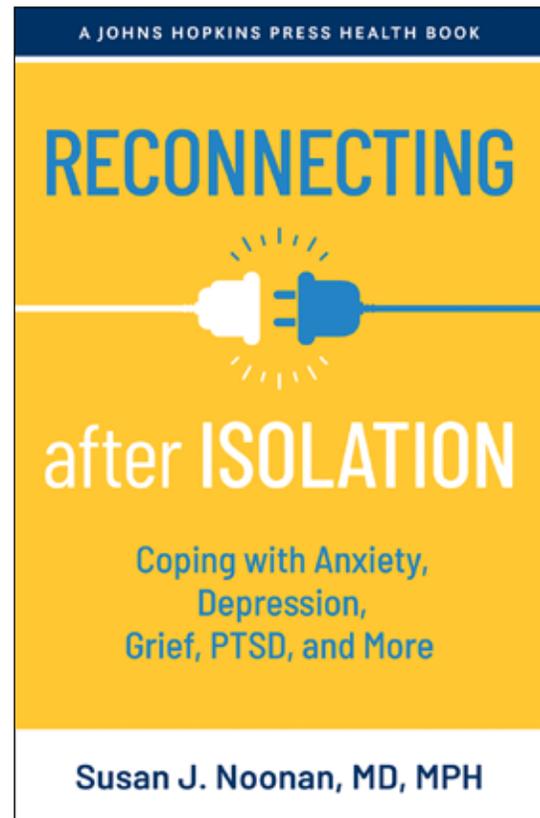

How to keep calm, carry on, and reconnect during times of social isolation and emotional crisis.

The book touches on how social isolation, loneliness, and stress affect each of us individually and can sometimes provoke depression, anxiety, post-traumatic stress disorder, suicidality, and substance use. Describing specific lifestyle interventions that may help, it offers tips for

- developing effective coping skills
- facing isolation-induced fears
- adapting effectively to the changes in our lives caused by imposed isolation
- finding effective, culturally sensitive mental health care
- building and maintaining resilience
- adopting a healthy routine
- overcoming the fatigue burnout
- grieving a loss
- maintaining contact with others

Accessible and compassionate, *Reconnecting after Isolation* empowers individuals to manage their own challenges, offering them a better chance of recovery and of staying well.

SUSAN J. NOONAN, MD, MPH (WELLESLEY, MA), is a physician, Certified Peer Specialist, mental health and wellness coach, and consultant to Massachusetts General Hospital, McLean Hospital, the Depression and Bipolar Support Alliance, and CliGnosis, Inc. She is the author of *Take Control of Your Depression: Strategies to Help You Feel Better Now* and *Helping Others with Depression: Words to Say, Things to Do*.

MAN KIND

Tools for Mental Health, Well-Being, and Modernizing Masculinity

ZACHARY GERDES, PhD, CREATOR OF THE LIFT MODEL

A Johns Hopkins Press Health Book

A groundbreaking guide that provides men with tools to improve their mental health and well-being.

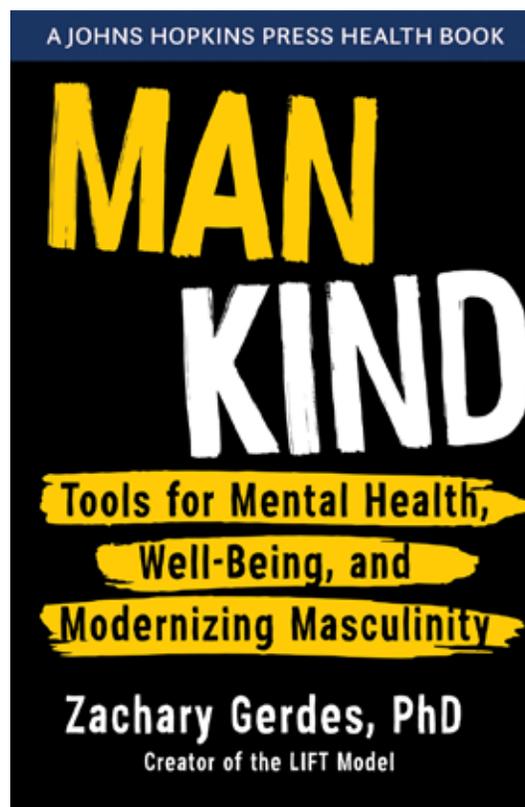

Masculinity requires a redesign. Men exhibit higher rates of suicide, lower rates of help-seeking, higher rates of substance use and abuse, and higher rates of anger and violence. How can this change? In *Man Kind*, counseling psychologist Zachary Gerdes, PhD, provides a framework for improving men's mental health and well-being while redefining what it means to be masculine. Rather than following a traditional view of masculinity focused on stoicism, patriarchy, and self-reliance, Gerdes provides his LIFT model—a road map to help men foster collaboration, understand when and how to utilize resources, and build mental resilience and flexibility.

In this empowering book, Gerdes

- helps men understand their thoughts and behaviors from a psychological perspective
- provides steps to help men change behaviors that are detrimental to their health and relationships
- outlines a model for healthy masculinity that incorporates psychological and relational practices for improving well-being
- explains the latest psychological and social science research on gender identity and masculinity to provide a scientific foundation for improving men's mental health
- operates on the Leverage, Insight, Freedom, Truth (LIFT) model, which Gerdes developed as an intervention to improve various health outcomes in men

Man Kind provides men with the tools they need to improve their mental health and well-being.

ZACHARY GERDES, PhD (SEATTLE, WA), is a captain in the United States Air Force, the director of psychological health at his current duty station, and a guest lecturer at Air University. He is also the founder and director of the outreach organization Lift the Mind.

LIVING WITH BREAST CANCER

The Step-by-Step Guide to Minimizing Side Effects and Maximizing Quality of Life

JENNIFER A. SHIN, MD, MPH, DAVID P. RYAN, MD, AND VICKI A. JACKSON, MD, MPH, WITH MICHELLE D. SEATON

A Johns Hopkins Press Health Book

Your complete resource for handling the physical and emotional effects of breast cancer treatments.

At the time of diagnosis, breast cancer patients are faced with many overwhelming decisions about possible treatments. *Living with Breast Cancer* provides you with an overview of what to expect from testing and treatment, which cancer specialists you may need to see, and common terms to use to help communicate your needs to your team. This empathetic resource full of relatable stories teaches patients and caregivers how to ask the right questions to get the best possible care.

The book helps readers

- make sense of their diagnosis
- understand the different types of therapies, tests, and scans
- manage the symptoms and side effects of treatment, such as nausea, fatigue, shortness of breath, weight fluctuations, and depression
- learn what medications and lifestyle modifications can help with symptoms
- live and cope with progressive cancer

Living with Breast Cancer is your definitive resource for handling the physical and emotional effects of breast cancer and treatment.

“The authors provide a soup-to-nuts guide for breast cancer patients, whether readers are newly diagnosed or farther along in their breast cancer journey.” —Kathy Steligo, author of *The Breast Reconstruction Guidebook: Issues and Answers from Research to Recovery*

LIVING WITH HEREDITARY CANCER RISK

What You and Your Family Need to Know

KATHY STELIGO, SUE FRIEDMAN, DVM, AND
ALLISON W. KURIAN, MD

A Johns Hopkins Press Health Book

The most comprehensive guide available on hereditary cancers, from understanding risk, prevention, and genetic counseling and testing to treatment, quality of life, and more.

Up to 10 percent of cancers are caused by inherited mutations in specific genes. Finding out that you or your loved ones may be at increased risk of developing cancer because of a genetic mutation raises a lot of questions: Is cancer inevitable? Is there anything I should do differently in my life? Will my children also be at higher risk of cancer? Should I have preemptive treatments or surgery? This comprehensive guide provides answers to these questions and more.

This book is a compilation of the trusted information and support provided for more than two decades by Facing Our Risk of Cancer Empowered (FORCE), the de facto voice of the hereditary cancer community.

Living with Hereditary Cancer Risk also provides coverage of

- signs of inherited cancer risk in a family;
- the value of genetic counseling and testing;
- mutations in *BRCA*, Lynch Syndrome, and other genes that elevate cancer risk;
- risk-reducing strategies;
- traditional treatments and newer personalized approaches, including immunotherapies and PARP inhibitors;
- nationally recommended guidelines for prevention, early detection, and treatment;
- insurance coverage and discrimination protections; and
- coping with sexual health, fertility, menopause, and other quality of life issues.

KATHY STELIGO (SAN CARLOS, CA), is the author of *The Breast Reconstruction Guidebook* and the coauthor of *Confronting Chronic Pain* and *The Breast Cancer Book*. She is a two-time breast cancer survivor. **SUE FRIEDMAN, DVM** (GULFPORT, FL), the founder and executive director of Facing Our Risk of Cancer Empowered (FORCE), is a breast cancer survivor with a *BRCA2* mutation. **ALLISON W. KURIAN, MD** (STANFORD, CA), is a clinical oncologist and the director of the Stanford Women's Clinical Cancer Genetics Program.

YOUR COMPLETE GUIDE TO LIVER HEALTH

Coping with Fatty Liver, Hepatitis, Cancer, and More

PAUL J. THULUVATH, MD, FRCP

A Johns Hopkins Press Health Book

Liver disease is a common cause of morbidity and mortality all over the world—and it's on the rise. Approximately 3.3 million US adults are currently living with hepatitis B or C, 25% of whom will go on to develop cirrhosis, cancer, or liver failure. More than 3 million new cases of fatty liver disease are reported each year in the United States alone, and the prevalence of this condition is increasing rapidly. Alcohol-related liver disease has become a leading cause of preventable death in young people.

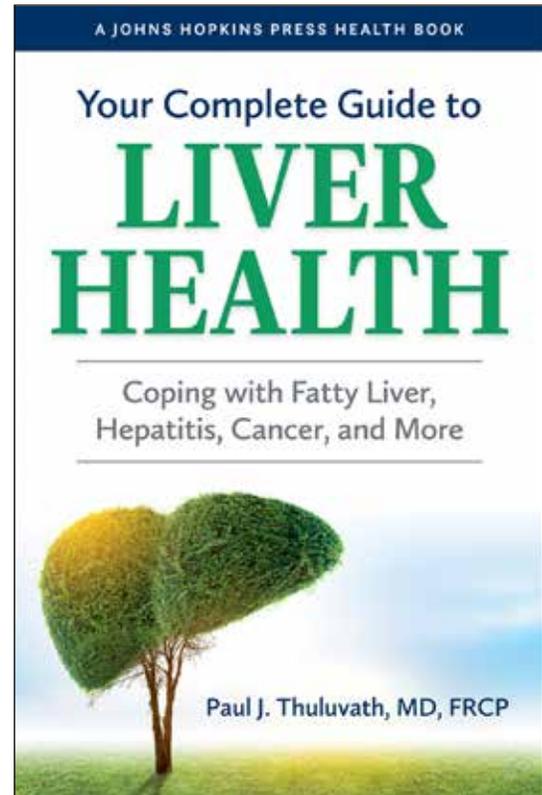

For those with any form of liver disease, this concise, practical guide from a trusted expert will help you take care of your liver and your health.

In *Your Complete Guide to Liver Health*, world-renowned gastroenterologist and liver specialist Dr. Paul J. Thuluvath reveals how everything from infections to the medications you take to what you eat and drink can affect not only your liver but also your overall health. Dr. Thuluvath teaches you all you need to know about this vital organ, including

- how your liver works
- how to prevent liver infections and disease
- how diseases that affect the liver, including cancer, liver failure, fatty liver, hepatitis, and more, are diagnosed and treated
- which foods, drinks, and supplements to avoid
- how you can take care of your liver and your health for the rest of your life

In each chapter of this comprehensive yet concise book, Dr. Thuluvath explains in easy-to-follow language how the liver is affected by the various conditions covered, along with how each particular disease is diagnosed and treated. Those with a liver disease need to take special care not to cause additional damage to their liver—this book shows you how.

PAUL J. THULUVATH, MD, FRCP (LUTHERVILLE, MD), is a clinical professor of medicine at the University of Maryland School of Medicine and the medical director of the Melissa L. Posner Institute of Digestive Health and Liver Disease at Mercy Medical Center in Baltimore. He is the author of *Hepatitis C: A Complete Guide for Patients and Families*.

THE CAREGIVER'S GUIDE TO MEMORY CARE AND DEMENTIA COMMUNITIES

RACHAEL WONDERLIN

A Johns Hopkins Press Health Book

Caring for someone with dementia is challenging, especially when it comes time to think about other living arrangements. What do you need to know about dementia, including its different stages? What do you do if the person you're caring for seems to have trouble recognizing you? When is it time to move a person living with dementia into a senior living community? And how can you maintain your relationship with your loved one when you are living apart?

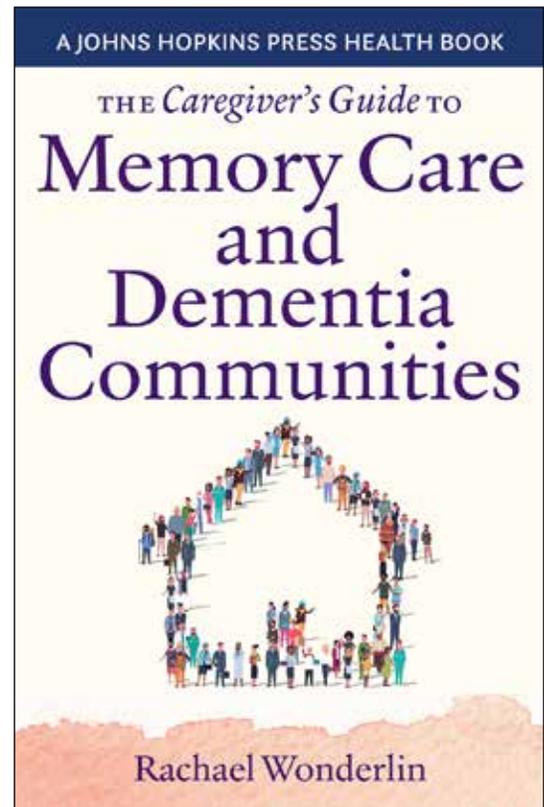

This practical guide provides general caregiving tips and helps you decide when and how to transition your loved one to a dementia care community.

Gerontologist and dementia care consultant Rachael Wonderlin has written a compassionate book that walks the reader through key points about dementia care, including

- common terminology used by health care workers
- strategies for taking care of your loved one
- advice for when and how to transition to a dementia care community
- understanding how dementia care communities are structured and what to keep in mind when evaluating them
- how to help your loved one receive the best possible care while they're living apart
- recommendations for handling obstacles involving communication and behavioral issues
- information on technology, hospice care, programming and activities, and at-home safety

A dedicated section called "Putting It into Practice" in each chapter helps you apply the principles to your own experience, while worksheets present you with questions to consider as part of the caregiving and assessment process.

Gerontologist **RACHAEL WONDERLIN (PITTSBURGH, PA)** is an internationally recognized dementia care consultant who owns a senior living consulting company and runs the popular blog and podcast by the same name, *Dementia By Day*. She is the author of *When Someone You Know Is Living in a Dementia Care Community* and the coauthor of *Creative Engagement: A Handbook of Activities for People with Dementia*.

COMPREHENSIVE GUIDE TO SUPPORTIVE AND PALLIATIVE CARE FOR PATIENTS WITH CANCER

(fourth edition)

JANET L. ABRAHM, MD, WITH MOLLY E. COLLINS, MD,
AND BETHANY-ROSE DAUBMAN, MD

A Johns Hopkins Press Health Book

For more than twenty years, this guide has been the go-to resource for busy practicing oncology and palliative care clinicians. This fourth edition, now titled *Comprehensive Guide to Supportive and Palliative Care for Patients with Cancer*, provides physicians, advanced practice clinicians, and patients and their families with detailed information and advice for alleviating the suffering of cancer patients and their loved ones.

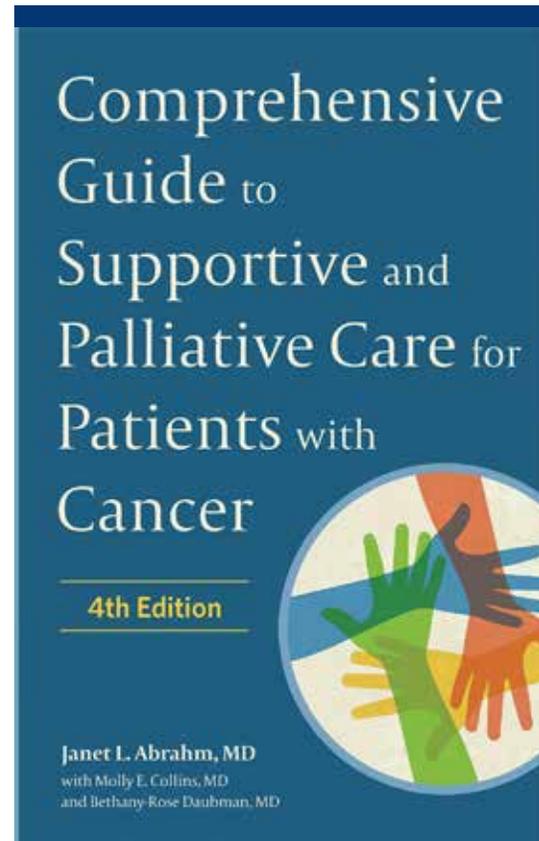

This edition reflects important updates in the field while addressing the informational needs of a broader market of health care providers, including social workers, psychologists, psychiatrists, bereavement counselors, and chaplains.

Leading palliative care experts illustrate how you can improve both communication with cancer patients and their quality of life.

This new edition features three new chapters—“Spiritual Care in Palliative Care,” “Psychological Considerations,” and “Bereavement”—as well as specific guidelines about

- advance care planning at all phases of cancer
- understanding complex family dynamics and communication challenges
- special considerations to take into account for LGBTQ+ patients and their loved ones
- caring for patients who have a serious mental illness along with a cancer diagnosis
- nonpharmacologic management of pain and other symptoms associated with cancer or its treatment

JANET L. ABRAHM, MD (CAMBRIDGE, MA), is a professor of medicine at Harvard Medical School and a member of the Department of Psychosocial Oncology and Palliative Care at the Dana-Farber Cancer Institute and Brigham and Women’s Hospital. **MOLLY E. COLLINS, MD** (NORTH BILLERICA, MA), is the director of medical education and the fellowship program director for the Supportive Oncology and Palliative Care Program at Fox Chase Cancer Center and an assistant professor of medicine at Lewis Katz School of Medicine at Temple University. **BETHANY-ROSE DAUBMAN, MD** (YARDLEY, PA), is an assistant professor of Medicine at Harvard Medical School, director of Continuing Medical Education for palliative care at Massachusetts General Hospital, and codirector of the Massachusetts General Hospital Global Palliative Care Program.

HIGHER EDUCATION

UNRAVELING FACULTY BURNOUT

Pathways to Reckoning and Renewal

REBECCA POPE-RUARK, PhD

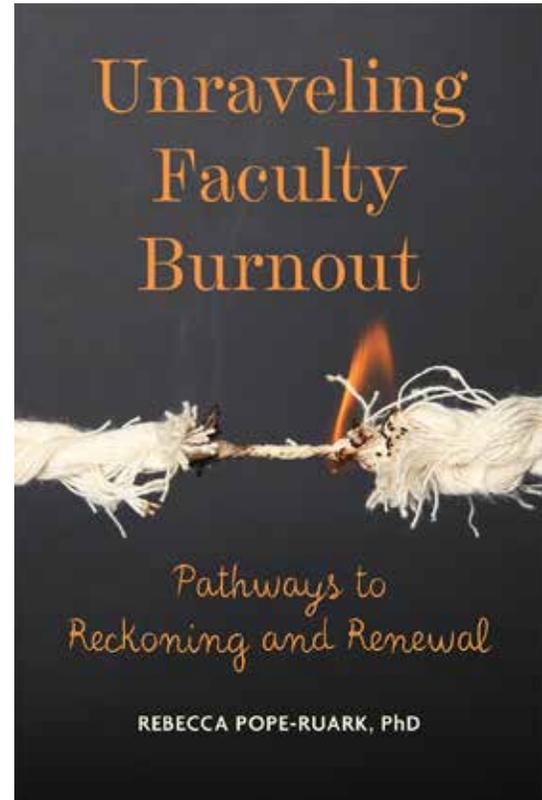

Faculty often talk about how busy, overwhelmed, and stressed they are. These qualities are seen as badges of honor in a capitalist culture that values productivity above all else. But for many women in higher education, exhaustion and stress go far deeper than end-of-the-semester malaise.

A timely book about assessing, coping with, and mitigating burnout in higher education.

Burnout, a mental health syndrome caused by chronic workplace stress, is endemic to higher education in a patriarchal, productivity-obsessed culture. In this unique book for women in higher education, Rebecca Pope-Ruark, PhD, draws from her own burnout experience, as well as collected stories of faculty in various roles and career stages, interviews with coaches and educational developers, and extensive secondary research to address and mitigate burnout. Pope-Ruark lays out four pillars of burnout resilience for faculty members: purpose, compassion, connection, and balance. Each chapter contains relatable stories, reflective opportunities and exercises, and advice from women in higher education.

Blending memoir, key research, and reflection opportunities, Pope-Ruark helps faculty not only address burnout personally but also use the tools in this book to eradicate the systemic conditions that cause it in the first place. As burnout becomes more visible, we can destigmatize it by acknowledging that women are not unraveling; instead, women in higher education are reckoning with the productivity cult embedded in our institutions, recognizing how it shapes their understanding and approach to faculty work, and learning how they can remedy it for themselves, their peers, and women faculty in the future.

REBECCA POPE-RUARK, PhD (ATLANTA, GA), is a faculty teaching and learning specialist in the Center for Teaching and Learning at the Georgia Institute of Technology. She is the author of *Agile Faculty: Practical Strategies for Managing Research, Service, and Teaching* and coeditor of *Redesigning Liberal Education: Innovative Design for a Twenty-First-Century Undergraduate Education*.

HOW TO CHAIR A DEPARTMENT

KEVIN DETTMAR

A practical, accessible handbook for chairing a department.

Higher Ed Leadership Essentials

Over the course of a typical academic career, most faculty will serve at least one term as chair of a department. It's a leadership and service role that's at the very heart of faculty satisfaction and student success, yet few receive any training on how to do the job. *How to Chair a Department* is a practical, accessible handbook for new and prospective chairs, providing both principles and practices for effective departmental leadership. The book features advice on a broad range of topics, from hiring and mentoring, to managing budgets and dealing with conflict, to meeting the needs of students.

KEVIN DETTMAR (CLAREMONT, CA) is the W. M. Keck Professor of English and director of the Humanities Studio at Pomona College. He is the author of *The Illicit Joyce of Postmodernism: Reading against the Grain* and *Gang of Four's Entertainment!* in Bloomsbury's 33 1/3 series and is a contributor to the *New Yorker* and the *Atlantic*.

HOW COLLEGES USE DATA

JONATHAN S. GAGLIARDI

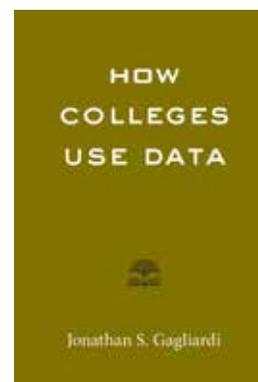

What does a culture of evidence really look like in higher education?

Higher Ed Leadership Essentials

The use of big data and the rapid acceleration of storage and analytics tools have led to a revolution of data use in higher education. In *How Colleges Use Data*, Jonathan S. Gagliardi presents college and university leaders with an important resource to help cultivate, implement, and sustain a culture of evidence through the ethical and responsible use and adoption of data and analytics. Gagliardi provides a broad context for data use among colleges, including key concepts and use cases related to data and analytics.

The book helps faculty and administrators understand important topics, including:

JONATHAN S. GAGLIARDI (NEW YORK, NY) is the Assistant Vice Chancellor for Academic Effectiveness and Innovation for the City University of New York. He is the coauthor of *The Analytics Revolution in Higher Education: Big Data, Organizational Learning, and Student Success*.

LGBTQ LEADERSHIP IN HIGHER EDUCATION

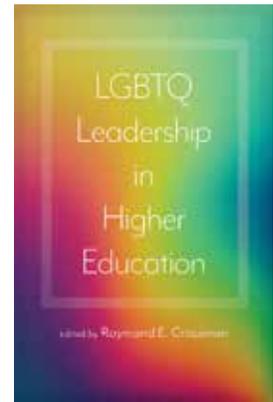

EDITED BY RAYMOND E. CROSSMAN

Why does queer leadership matter? In this book, the first of its kind, 15 LGBTQ presidents and chancellors in higher education provide insight into their experiences and highlight the importance of queer leadership for the academy and the world.

In *LGBTQ Leadership in Higher Education*, Raymond Crossman has collected the wisdom of currently serving or retired LGBTQ leaders, who write from their lived and specific experiences.

In essays ranging across topics that include intersectionality, mentorship, feminism, self-care, coming out, heteronormativity, and partners and spouses, the authors address why LGBTQ leadership matters and why diversity, inclusion, and equity in leadership are important to meet today's challenges for higher education and human rights.

RAYMOND E. CROSSMAN (CHICAGO, IL) is a social justice activist, educator, and psychologist who is currently the longest-serving LGBTQ university president in North America. He was appointed president of Adler University in 2003.

UNSETTLING THE UNIVERSITY

Confronting the Colonial Foundations of US Higher Education

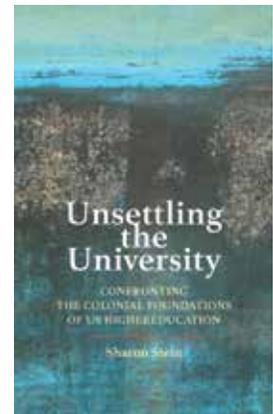

SHARON STEIN

Critical University Studies

Shifts the narrative around the history of US higher education to examine its colonial past.

Over the past several decades, higher education in the United States has been shaped by marketization and privatization. Efforts to critique these developments often rely on a contrast between a bleak present and a romanticized past. In *Unsettling the University*, Sharon Stein offers a different entry point—one informed by decolonial theories and practices—for addressing these issues by describing the colonial violence underlying three of the most celebrated moments in US higher education history: the founding of the original colonial colleges, the creation of land-grant colleges and universities, and the post-World War II “Golden Age.”

SHARON STEIN (VANCOUVER, BC / MUSQUEAM TERRITORY) is an assistant professor of higher education at the University of British Columbia and a visiting professor with the Chair for Critical Studies in Higher Education Transformation at Nelson Mandela University. She is the founder of the Critical Internationalization Studies Network and a founding member of the Gesturing Towards Decolonial Futures Collective.

HIGHER EDUCATION IN RUSSIA

YAROSLAV KUZMINOV AND MARIA YUDKEVICH
FOREWORD BY PHILIP G. ALTBACH

A comprehensive, up-to-date look at modern Russian higher education.

Higher Education in Russia is the first comprehensive, up-to-date overview and analysis of modern Russian higher education. Aimed at a large international audience, it describes the current realities of higher education in Russia, as well as the main principles, logic, and relevant historical and cultural factors. Outlining the development of the higher education system in tsarist Russia throughout the nineteenth century, Yaroslav Kuzminov and Maria Yudkevich describe the development of its mass-scale higher education system from the end of the Second World War to the collapse of the Soviet Union and beyond.

YAROSLAV KUZMINOV (MOSCOW, RU) is a research adviser and the founding rector of HSE University, Russia, where he served from 1992 to 2021. **MARIA YUDKEVICH** (MOSCOW, RU) is a head of the Center for Institutional Studies and a vice rector at HSE University, Russia. Together, they are the coeditors of *The Global Future of Higher Education and the Academic Profession: The BRICs and the United States*.

DANIEL COIT GILMAN AND THE BIRTH OF THE AMERICAN RESEARCH UNIVERSITY

MICHAEL T. BENSON

One of the most remarkable education leaders of the late nineteenth century and the creator of the modern American research university finally gets his due.

In *Daniel Coit Gilman and the Birth of the American Research University*, Michael T. Benson argues that Daniel Coit Gilman's enduring legacy will always be as the father of the modern research university—a uniquely American invention that remains the envy of the entire world. In the past half-century, nothing has been written about Gilman that takes into account his detailed journals, reviews his prodigious correspondence, or considers his broad external board service. This book fills an enormous void in the history of the birth of the “new” American system of higher education, especially as it relates to graduate education. The late 1800s, Benson points out, is one of the most pivotal periods in the development of the American university model; this book reveals that there is no more important figure in shaping that model than Daniel Coit Gilman.

MICHAEL T. BENSON (MYRTLE BEACH, SC) is the president of Coastal Carolina University, where he is also a professor of history. He is the author of *Harry S. Truman and the Founding of Israel* and the coauthor of *College for the Commonwealth: A Case for Higher Education in American Democracy*.

SCIENCE FOR A GREEN NEW DEAL

Connecting Climate, Economics, and Social Justice

ERIC A. DAVIDSON

Science, not politics, can take us beyond the hype and headlines to forge a realistic green new deal.

Since it was first proposed in the US House of Representatives, the Green New Deal has been hotly debated, often using partisan characterizations that critique it as extreme or socialist. In *Science for a Green New Deal*, Eric Davidson dissects this legislative resolution. He also shows how green new deal thinking offers a framework for a much-needed convergence to develop holistic policy solutions to the most pressing issues of our day. Finally, Davidson makes the case for linkages among multiple global crises, including a pandemic and a renewed, chilling awareness of profound social injustices highlighted by the Black Lives Matter movement.

ERIC A. DAVIDSON (FROSTBURG, MD) is a professor in the Appalachian Laboratory at the University of Maryland Center for Environmental Science. He is the author of *You Can't Eat GNP: Economics As If Ecology Mattered*.

WOMEN IN WILDLIFE SCIENCE

Building Equity, Diversity, and Inclusion

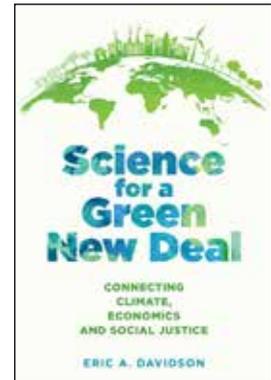

EDITED BY CAROL L. CHAMBERS AND KERRY L. NICHOLSON

The first book to address the challenges and opportunities for women, especially from underrepresented communities, in wildlife professions.

Women in Wildlife Science is dedicated to the work of promoting diversity, equity, and inclusion in the field of wildlife conservation and management. The combination review the history, analyze the status, and celebrate the achievements of women in wildlife science. They share proven models and proposals for new methods to increase the inclusion of women in wildlife professions based on an intersectional framework. Covering academic and professional spheres, the book lays bare the challenges women face entering and excelling in the field of wildlife conservation and management, illustrated by personal stories of struggle and victory, and grounded in peer-reviewed scientific literature unavailable anywhere else. Centering perspectives from LGBTQ, BIPOC, and other marginalized communities, *Women in Wildlife Science* is a pragmatic guide to ensuring a more diverse, just, and equitable future.

CAROL L. CHAMBERS, PhD (FLAGSTAFF, AZ), is a professor of wildlife ecology in the School of Forestry at Northern Arizona University and past president of The Wildlife Society.

KERRY L. NICHOLSON, PhD (FAIRBANKS, AK), is a research wildlife biologist in the Alaska Department of Fish and Game.

WILDLIFE MANAGEMENT AND CONSERVATION

Contemporary Principles and Practices (second edition)

EDITED BY PAUL R. KRAUSMAN AND JAMES W. CAIN III

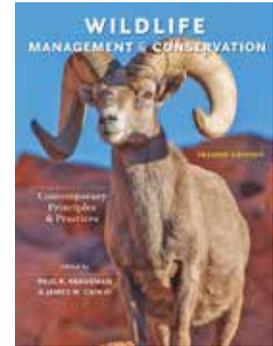

Published in Association with The Wildlife Society

Wildlife Management and Conservation presents a clear overview of the management and conservation of animals, their habitats, and how people influence both. The relationship among these three components of wildlife management is explained in chapters written by leading experts and designed to prepare students for careers in which they will be charged with maintaining healthy animal populations.

The definitive textbook for students of wildlife management, now updated.

This second edition, updated throughout, features many new topics: communication in the wildlife profession, fire science, Native American models of management and conservation, plant–animal interactions, and quantitative analysis of wildlife populations.

PAUL R. KRAUSMAN (SANTA FE, NM) is an emeritus professor in the School of Natural Resources and the Environment at the University of Arizona. **JAMES W. CAIN III** (LAS CRUCES, NM) is the assistant unit leader of the US Geological Survey, New Mexico Cooperative Fish and Wildlife Research Unit New Mexico State University, where he is an affiliate professor in the Department of Fish, Wildlife and Conservation Ecology.

SEXUAL SEGREGATION IN UNGULATES

Ecology, Behavior, and Conservation

R. TERRY BOWYER

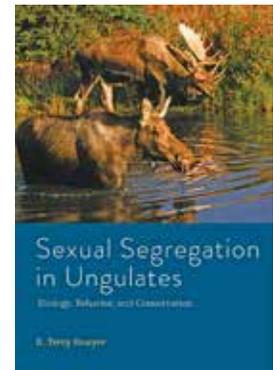

Published in Association with The Wildlife Society

Sexual segregation, wherein the sexes of a species live apart for long periods of time, has far-reaching consequences for the ecology, behavior, and conservation of hooved mammals, which are called ungulates.

Why does it benefit some male and female animals to live separately?

In *Sexual Segregation in Ungulates*, Bowyer's critical, thought-provoking approach helps resolve long-standing disagreements concerning sexual segregation and offers future pathways for species and habitat conservation.

R. TERRY BOWYER (ESTACADA, OR) is Professor Emeritus of Wildlife Ecology and senior research scientist at the Institute of Arctic Biology of the University of Alaska Fairbanks. He has received the Distinguished Moose Biologist Award, the O. C. Wallmo Award for his studies of mule deer, and the C. Hart Merriam Award for his outstanding contributions to the science of mammalogy.

HUMAN-WILDLIFE CONFLICT MANAGEMENT

Prevention and Problem Solving (second edition)

RUSSELL F. REIDINGER, JR.

The latest edition of this classic guide details how to understand and resolve a broad array of human-wildlife conflicts.

This new edition of *Human-Wildlife Conflict Management* updates our understanding of the human dimensions, as well as biological and ecological concepts, underlying human-wildlife conflicts. While it provides wildlife professionals and students with the knowledge and adaptive management strategies to resolve such conflicts, it uniquely explores negative interactions with a wide range of wildlife taxa beyond those typically covered in traditional wildlife damage management, including invasive plants, invertebrates, and fish.

RUSSELL F. REIDINGER, JR., PhD, (COLUMBIA, MO), is an affiliate associate professor at Colorado State University. He is a former researcher and director of the United States Department of Agriculture's National Wildlife Research Center, the nation's only research center devoted to the study and resolution of human-wildlife conflicts.

CAVE BIODIVERSITY

Speciation and Diversity of Subterranean Fauna

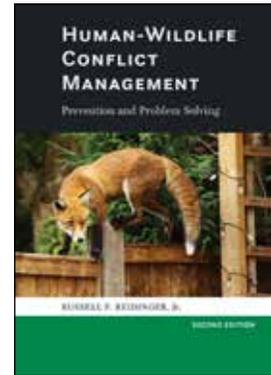

EDITED BY J. JUDSON WYNNE

Edited by cave scientist and conservation ecologist Dr. J. Judson Wynne, *Cave Biodiversity* explores both the evolution and the conservation of subterranean-dwelling fauna.

A deep-dive into the evolutionary biology, biogeography, and conservation of the most elusive subterranean creatures in the world.

Covering both vertebrates and invertebrates, this volume brings together ichthyologists, entomologists, ecologists, herpetologists, and conservationists to provide a nuanced picture of life beneath the earth's surface. Chapters covering biotic and abiotic factors that influence evolution and support biodiversity precede chapters dedicated to specific taxa, highlighting phylogenetics and morphology, and delving into zoogeography, habitat, ecology, and dispersal mechanisms for each.

J. JUDSON WYNNE (FLAGSTAFF, AZ) is an assistant research professor of cave ecology at Northern Arizona University.

HESIOD

Theogony, Works and Days, Shield (third edition)

TRANSLATION, INTRODUCTION, AND NOTES
BY APOSTOLOS N. ATHANASSAKIS

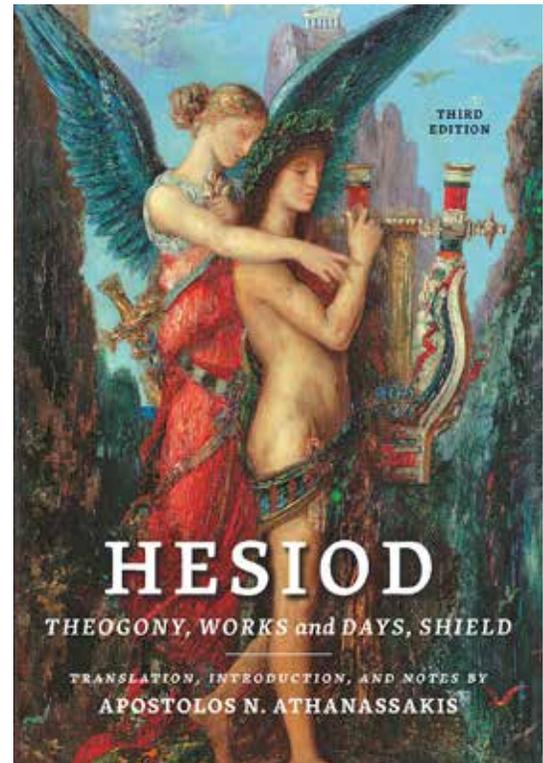

Next to the works of Homer, Hesiod's poems are foundational texts for students of the classics. His two major surviving works, the *Theogony* and the *Works and Days*, address the divine and the mundane, respectively.

This best-selling translation of Hesiod's the *Theogony*, the *Works and Days*, and the *Shield* has been updated into the most indispensable edition yet for students of Greek mythology and literature.

Introducing his celebrated translations of Hesiod, Apostolos N. Athanassakis positions the philosopher-poet as heir to a long tradition of Hellenic poetry. Hesiod's poems demonstrate the author's passionate interest in the governance of human society through justice and a tangible work ethic. As a physicist and a materialist, Hesiod avoided such subjects as honor and the afterlife. His works contain the oldest fundamentals on law and Greek economy, making Hesiod the first great thinker of Western civilization. Athanassakis's contextual notes offer both comparison to Biblical and Norse mythologies as well as anthropological connections to modern Greece.

The third edition of this classic undergraduate text includes a thoroughly updated bibliography reflecting the last two decades of scholarship. The introductions and notes have been enriched, clarifying contextual history and the meaning of Hesiod's own language and themes, and notes have been newly added to the *Shield*. Athanassakis has lightly improved his translation throughout the text, expertly balancing the natural flow of the verse while adhering closely to the literal Greek.

APOSTOLOS N. ATHANASSAKIS (ATHENS, GR) is professor emeritus in the Department of Classical Studies at the University of California, Santa Barbara, where he held the Argyropoulos Chair in Hellenic Studies from 2001 to 2011. Among his many translations is *The Homeric Hymns*.

FOOLING WITH THE AMISH

Amish Mafia, Entertaining Fakery, and the Evolution of Reality TV

DIRK EITZEN

YOUNG CENTER BOOKS IN ANABAPTIST AND PIETIST STUDIES

When *Amish Mafia* was released in 2012, viewers were fascinated by the stories of this secret group of Amish and Mennonite enforcers who used threats, extortion, and violence to keep members of the Amish community in line. While some of the stories were based loosely on actual events, the group itself was a complete fabrication.

Using *Amish Mafia* as a window into the interplay between the real and the imagined, this book dissects the peculiar appeals and potential dangers of deception in reality TV and popular entertainment.

Fooling with the Amish answers two questions that have long puzzled media scholars: What is it about the so-called reality of reality shows that appeals to and gratifies viewers? How and why are people taken in by falsehoods in the media?

DIRK EITZEN (LITITZ, PA), is a professor of film and media at Franklin & Marshall College. He lives in Lancaster County, Pennsylvania, where much of *Amish Mafia* was shot.

BEFORE BORDERS

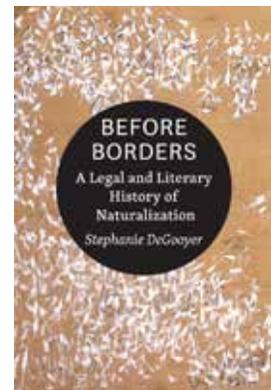

A Legal and Literary History of Naturalization

STEPHANIE DEGOOYER

An ambitious revisionist history of naturalization as a creative mechanism for national expansion.

Before borders determined who belonged in a country and who did not, lawyers and judges devised a legal fiction called naturalization to bypass the idea of feudal allegiance and integrate new subjects into their nations. At the same time, writers of prose fiction were attempting to undo centuries of rules about who could—and who could not—be a subject of literature. In *Before Borders*, Stephanie DeGooyer reconstructs how prose and legal fictions came together in the eighteenth century to dramatically reimagine national belonging through naturalization. The bureaucratic procedure of naturalization today was once a radically fictional way to create new citizens and literary subjects. Through early modern court proceedings, the philosophy of John Locke, and the novels of Daniel Defoe, Laurence Sterne, Maria Edgeworth, and Mary Shelley, DeGooyer follows how naturalization evolved in England against the backdrop of imperial expansion.

STEPHANIE DEGOOYER (CHAPEL HILL, NC) is an assistant professor and Frank Borden Hanes and Barbara Lasater Hanes Fellow in the Department of English and Comparative Literature at the University of North Carolina at Chapel Hill. She is the coauthor of *The Right to Have Rights*.

SITUATING POETRY

Covenant and Genre in American Modernism

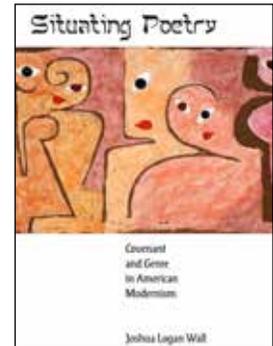

JOSHUA LOGAN WALL

A retelling of American modernism through the lines of solidarity and division within and among ethnic and religious identities found in poetry.

What happens if we approach the reading and writing of poetry not as an individual act but as a public one? Answering this question challenges common assumptions about modern poetry and requires that we explore the important questions that define genre: Where is this poem situated, and how did it get there?

Joshua Logan Wall's *Situating Poetry* studies five poets of the New York literary scene rarely considered together: James Weldon Johnson, Charles Reznikoff, Lola Ridge, Louis Zukofsky, and Robert Hayden. Charting their works and careers, Wall illustrates how these politically marginalized writers wrestled with their status as American outsiders. These poets produced a secularized version of America in which poetry, rather than God, governed individual obligations to one another across multiethnic barriers.

JOSHUA LOGAN WALL (ANN ARBOR, MI) is a lecturer at the University of Michigan.

THE ACADEMIC AVANT-GARDE

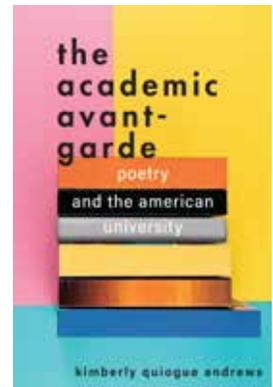

Poetry and the American University

KIMBERLY QUIOGUE ANDREWS

The surprising story of the relationship between experimental poetry and literary studies.

In this definitive rebuttal to the idea that the American MFA program is the hallmark of writing practice, Kimberly Quiogue Andrews lays out a foundational theory of the interconnectedness of literary criticism with the work of poets. A provocative and luminous study, *The Academic Avant-Garde* makes the case for the radical poetic possibilities of the work of literary scholarship. In her examination of the cross-pollination between the analytic humanities and the craft of poetry writing, Andrews tells a bold story about some of today's most innovative literary works.

KIMBERLY QUIOGUE ANDREWS (OTTOWA, ON) is an assistant professor of English at the University of Ottawa. She is the author of two collections of poetry, *A Brief History of Fruit* and *BETWEEN*.

THE JOHNS HOPKINS GUIDE TO PSYCHOLOGICAL FIRST AID

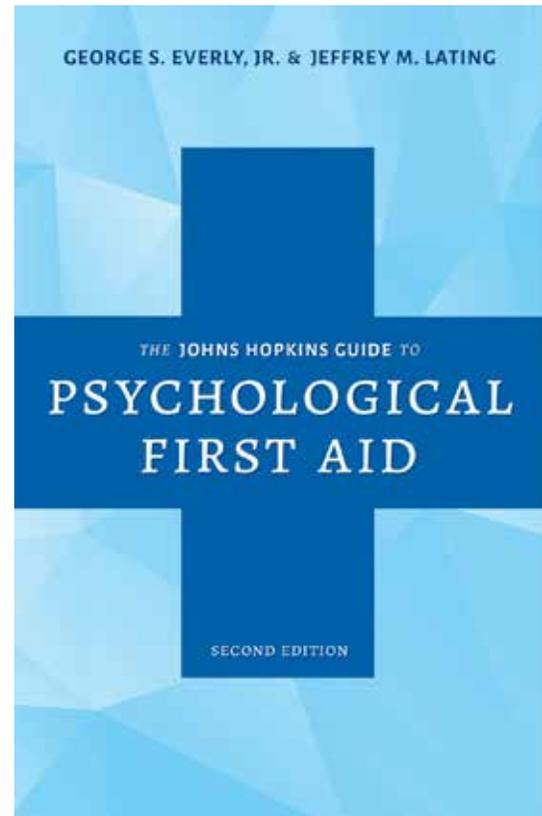

(second edition)

GEORGE S. EVERLY, JR. AND JEFFREY M. LATING

Learn the essential skills of psychological first aid from the experts—the creators of the Johns Hopkins RAPID PFA method.

Psychological first aid, or PFA, is designed to mitigate the effects of acute stress and trauma and assist those in crisis to cope effectively. PFA can be applied in emergencies, including disasters, terrorist attacks, and the COVID-19 pandemic. In the second edition of this essential guide, George S. Everly, Jr., and Jeffrey M. Lating draw on their experiences in Kuwait after the Gulf War, in New York City after the September 11 attacks, and during the COVID-19 pandemic to describe the principles and practices of PFA in an easy-to-follow, prescriptive, and practical manner. Informed by current events, the second edition includes updated chapters as well as three completely new chapters.

GEORGE S. EVERLY, JR. (SEVERNA PARK, MD) is an associate professor of psychiatry and behavioral sciences at Johns Hopkins School of Medicine and an adjunct professor of international health at Johns Hopkins Bloomberg School of Public Health. He is a former member of Johns Hopkins Center for Public Health Preparedness. **JEFFREY M. LATING** (SPARKS, MD) is a professor of psychology at Loyola University Maryland.

CURRICULUM DEVELOPMENT FOR MEDICAL EDUCATION

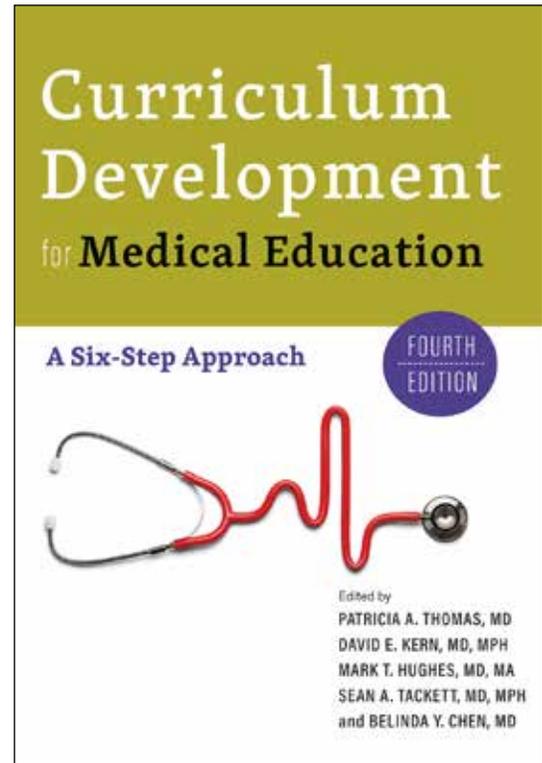

A Six-Step Approach (fourth edition)

A thoroughly revised and updated fourth edition of a text that has become an international standard for curriculum development in health professional education.

EDITED BY PATRICIA A. THOMAS, MD,
DAVID E. KERN, MD, MPH, MARK T. HUGHES, MD, MA,
SEAN A. TACKETT, MD, MPH, AND
BELINDA Y. CHEN, MD

Intended for faculty and other content experts who have an interest or responsibility as educators in their discipline, *Curriculum Development for Medical Education* has extended its vision to better serve a diverse professional and international audience. Building on the time-honored, practical, and user-friendly approach of the six-step model of curriculum development, this edition is richly detailed, with numerous examples of innovations that challenge traditional teaching models

PATRICIA A. THOMAS, MD (BALTIMORE, MD), is professor emerita of medicine at Johns Hopkins University. **DAVID E. KERN, MD, MPH (BALTIMORE, MD)**, is professor emeritus of medicine at Johns Hopkins University. **MARK T. HUGHES, MD, MA (BALTIMORE, MD)**, is an assistant professor of medicine at Johns Hopkins University School of Medicine and core faculty of the Berman Institute of Bioethics. **SEAN A. STRATEGIC SCIENCE COMMUNICATION

A Guide to Setting the Right Objectives for More Effective Public Engagement

JOHN C. BESLEY AND ANTHONY DUDO

What tactics can effective science communicators use to reach a wide audience and achieve their goals?

Effective science communication—the type that can drive behavior change while boosting the likelihood that people will turn to science when faced with challenges—is not simply a matter of utilizing social media or employing innovative tactics like nudges. Even more important for success is building long-term strategic paths to achieve well-articulated goals. In this guidebook, John C. Besley and Anthony Dudo encapsulate their practical expertise in 11 evidence-based principles of strategic science communication.

JOHN C. BESLEY (EAST LANSING, MI) is the Ellis N. Brandt Professor of Public Relations at Michigan State University. **ANTHONY DUDO** (AUSTIN, TX) is an associate professor in the School of Public Relations & Advertising at the University of Texas, Austin, where he is the program director of science communication at the Center for Media Engagement.

ABSTRACTIONS AND EMBODIMENTS

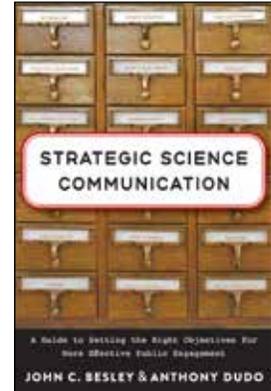

New Histories of Computing and Society

EDITED BY JANET ABBATE AND STEPHANIE DICK

Cutting-edge historians explore ideas, communities, and technologies around modern computing to explore how computers mediate social relations.

Using twin frameworks of abstraction and embodiment, a reformulation of the old mind-body dichotomy, this anthology examines how social relations are enacted in and through computing. Offering a rich and diverse set of studies in new areas, the book explores such disparate themes as disability, the influence of the punk movement, working mothers as technical innovators, and gaming behind the Iron Curtain.

JANET ABBATE (FALLS CHURCH, VA) is a professor of science, technology, and society at Virginia Tech. She is the author of *Inventing the Internet and Recoding Gender: Women's Changing Participation in Computing*. **STEPHANIE DICK** (VANCOUVER, BC) is an assistant professor in the School of Communication at Simon Fraser University.

CONSUMING LANDSCAPES

What We See When We Drive and Why It Matters

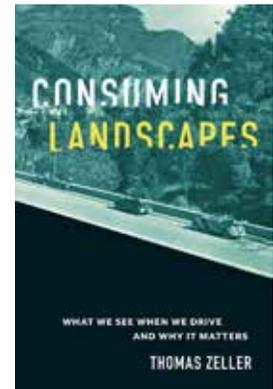

THOMAS ZELLER

What we see through our windshields reflects ideas about our national identity, consumerism, and infrastructure.

For better or worse, windshields have become a major frame for viewing the nonhuman world and experiencing our environments. These vistas are the result of deliberate historical forces, and humans have shaped them as they simultaneously sought to be transformed by them. In *Consuming Landscapes*, Thomas Zeller explores how what we see while driving reflects how we view our societies and ourselves, the role that consumerism plays in our infrastructure, and ideas about reshaping the environment in the twentieth century.

He focuses specifically on the Blue Ridge Parkway in the United States and the German Alpine Road as case studies.

THOMAS ZELLER (COLLEGE PARK, MD) is an associate professor in the Department of History at the University of Maryland, College Park. He is the author of *Driving Germany: The Landscape of the German Autobahn, 1930–1970* and the coeditor of *The World beyond the Windshield: Roads and Landscapes in the United States and Europe*.

EXPERIMENTING WITH HUMANS AND ANIMALS

From Aristotle to CRISPR (second edition)

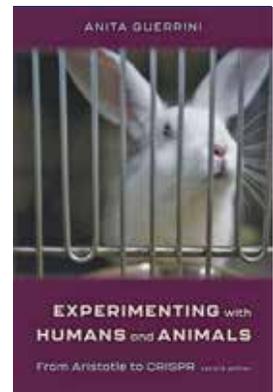

ANITA GUERRINI

Experimentation on animals—particularly humans—is often assumed to be a uniquely modern phenomenon. But the ideas and attitudes that encourage biological and medical scientists to experiment on living creatures date from the earliest expressions of Western thought. In *Experimenting with Humans and Animals*, Anita Guerrini looks at the history of these practices and examines the philosophical and ethical arguments that justified them.

Examining the ideas and attitudes that encourage scientists to experiment on living creatures, what their justifications are, and how these have changed over time.

A new chapter brings the story up to the present while reflecting on the current regulatory scene, new developments in science, and emerging genomics.

ANITA GUERRINI (VENTURA, CA) is the Horning Professor in the Humanities Emerita at Oregon State University and a research professor of history at the University of California, Santa Barbara. She is the author of *The Courtiers' Anatomists: Animals and Humans in Louis XIV's Paris*.

CANCER VIRUS HUNTERS

A History of Tumor Virology

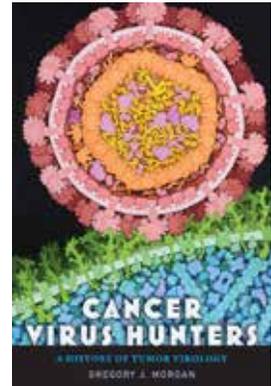

GREGORY J. MORGAN

Traces the history of the study of tumor viruses and its role in driving breakthroughs in cancer research.

In *Cancer Virus Hunters*, Gregory J. Morgan offers a novel approach to understanding the interconnectedness of long series of biomedical breakthroughs, including those that led to seven Nobel prizes. Among other advances, Morgan describes and contextualizes the science that prompted the discoveries of reverse transcriptase, RNA splicing, the tumor suppressor p53, the vaccine for hepatitis B, and the HIV test. He also explores how “cancer virus hunters” have demonstrated the virtue of beginning with a simple system, even when investigating a complex disease like cancer.

Based on extensive archival research and over fifty interviews with experts, *Cancer Virus Hunters* is a tour de force summarizing a century of research to show how discoveries made with tumor viruses came to dominate the contemporary understanding of cancer.

Gregory J. Morgan (HOBOKEN, NJ) is an associate professor specializing in the history and philosophy of science at Stevens Institute of Technology. He is the editor of *Philosophy of Science Matters: The Philosophy of Peter Achinstein*.

WHY WELLNESS SELLS

Natural Health in a Pharmaceutical Culture

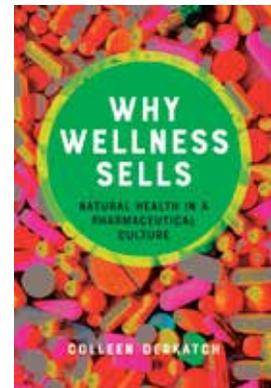

COLLEEN DERKATCH

Public interest in wellness is driven by two opposing philosophies of health that cycle into and amplify each other: restoration, where people use natural health products to restore themselves to prior states of wellness; and enhancement, where people strive for maximum wellness by optimizing their body's systems and functions.

How and why the idea of wellness holds such rhetorical—and harmful—power.

Derkatch tracks the tension between these two ideas of wellness across a variety of sources, including interviews, popular and social media, advertising, and online activism. Derkatch offers a nuanced account of how language, belief, behavior, experience, and persuasion collide to produce and promote wellness, one of the most compelling—and harmful—concepts that govern contemporary Western life.

COLLEEN DERKATCH (TORONTO, ON) is an associate professor in the Department of English at Ryerson University and the author of *Bounding Biomedicine: Evidence and Rhetoric in the New Science of Alternative Medicine*.

DISABILITY DIALOGUES

Advocacy, Science, and Prestige in Postwar Clinical Professions

ANDREW J. HOGAN

Disability activism has fundamentally changed American society for the better—and along with it, the views and practices of many clinical professionals. In *Disability Dialogues*, Andrew J. Hogan highlights the contributions of disabled people—along with their family members and other allies—in changing clinical understandings and approaches to disability.

A historical look at how activists influenced the adoption of more positive, inclusive, and sociopolitical views of disability.

Hogan examines the evolving medical, social, and political engagement of three postwar professions—clinical psychology, pediatrics, and genetic counseling—with disability and disability-related advocacy.

ANDREW J. HOGAN (OMAHA, NE) is the Fr. Henry W. Casper, S.J. Professor of History and an associate professor in the Departments of History and Medical Humanities at Creighton University.

INHERITING THE BOMB

The Collapse of the USSR and the Nuclear Disarmament of Ukraine

MARIANA BUDJERYN

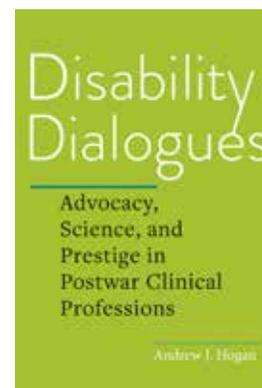

JOHNS HOPKINS NUCLEAR HISTORY AND CONTEMPORARY AFFAIRS

The collapse of the Soviet Union in 1991 left its nearly 30,000 nuclear weapons spread over the territories of four newly sovereign states: Belarus, Kazakhstan, the Russian Federation, and Ukraine. This collapse cast a shadow of profound ambiguity over the fate of the world's largest arsenal of the deadliest weapons ever created. In *Inheriting the Bomb*, Mariana Budjeryn reexamines the history of nuclear predicament caused by the Soviet collapse and the subsequent nuclear disarmament of the non-Russian Soviet successor states.

The collapse of the Soviet Union unleashed the specter of the largest wave of nuclear proliferation in history. Why did Ukraine ultimately choose the path of nuclear disarmament?

How was this international proliferation crisis averted in Ukraine specifically? Drawing on extensive archival research in the former Soviet Union and the United States, Budjeryn uncovers a fuller and more nuanced narrative of post-Soviet denuclearization.

MARIANA BUDJERYN (SOUTH BERWICK, ME) is a researcher on the Project on Managing the Atom at the Harvard Kennedy School's Belfer Center.

MISINFORMATION NATION

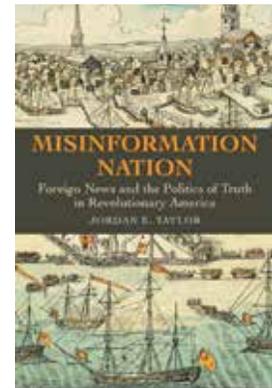

Foreign News and the Politics of Truth in Revolutionary America

JORDAN E. TAYLOR

Fundamentally reshapes our understanding of the causes of the American Revolution and the pivotal role foreign news and misinformation played in driving colonists to revolt.

“Fake news” is not new. Just like millions of Americans today, the revolutionaries of the eighteenth century worried that they were entering a “post-truth” era. Their fears, however, were not fixated on social media or clickbait but rather on peoples’ increasing reliance on reading news gathered from foreign newspapers. In *Misinformation Nation*, Jordan E. Taylor reveals how foreign news defined the boundaries of American politics and ultimately drove colonists to revolt against Britain and create a new nation.

JORDAN E. TAYLOR (BLOOMINGTON, IN) is an editor and historian of American media and politics.

HOLD IT REAL STILL

Clint Eastwood, Race, and the Cinema of the American West

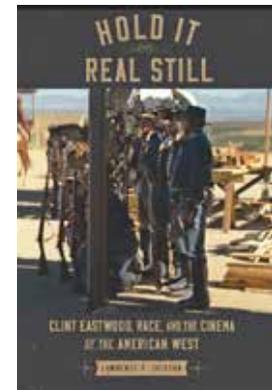

LAWRENCE P. JACKSON

How did the American western feature film genre rebrand itself in the late seventies and respond to the fury of global and domestic political affairs?

In *Hold It Real Still*, Lawrence Jackson examines Clint Eastwood’s influence on the western film while also exploring how that genre continues to operate into the twenty-first century as an ideological channel for ideas about race and imperialism. The western genre pivoted from an initial doctrine of racial liberalism, albeit a clumsy one, during the John Wayne years to an agenda of substitution, exclusion, and false equivalency during the Clint Eastwood period. Jackson situates Eastwood’s work as a response to massive social and political upheavals in America: defeat in Vietnam, riots in northern cities, the civil rights movement and associated legislation, and the Great Migration.

Tackling the rise of neoracism and the domestic apparatus of surveillance, control, and erasure, *Hold It Real Still* offers an astonishing revision of a uniquely American genre of film.

LAWRENCE P. JACKSON (BALTIMORE, MD) is a Bloomberg Distinguished Professor of English and History at Johns Hopkins University. He is the author of *Chester B. Himes: A Biography* and *Shelter: A Black Tale of Homeland, Baltimore*.

NATURE'S LABORATORY

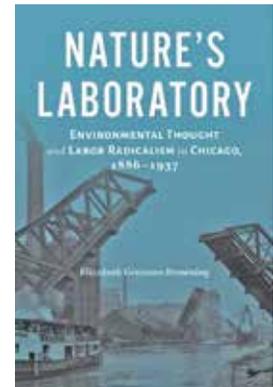

Environmental Thought and Labor Radicalism in Chicago, 1886–1937

ELIZABETH GRENNAN BROWNING

The untold history of how Chicago served as an important site of innovation in environmental thought as America transitioned to modern, industrial capitalism.

In *Nature's Laboratory*, Elizabeth Grennan Browning argues that Chicago offers the clearest lens for analyzing the history of the intellectual divide between countryside and city in the United States at the end of the nineteenth century. By examining both the material and intellectual underpinnings of Gilded Age and Progressive Era environmental theories, Browning shows how Chicago served as an urban laboratory where public intellectuals and industrial workers experimented with various strains of environmental thinking to resolve conflicts between capital and labor, between citizens and their governments, and between immigrants and long-term residents.

ELIZABETH GRENNAN BROWNING (BLOOMINGTON, IN) is an environmental history research fellow at the Indiana University Environmental Resilience Institute and an adjunct assistant professor of history at Indiana University Bloomington.

STREET DIPLOMACY

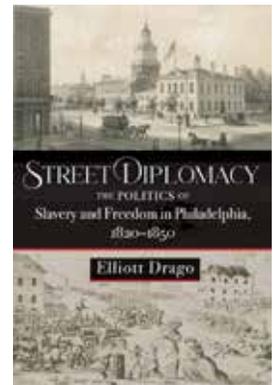

The Politics of Slavery and Freedom in Philadelphia, 1820–1850

ELLIOTT DRAGO

An illuminating look at how Philadelphia's antebellum free Black community defended themselves against kidnappings and how this "street diplomacy" forced Pennsylvanians to confront the politics of slavery.

As the most southern of northern cities in a state that bordered three slave states, antebellum Philadelphia maintained a long tradition of both abolitionism and fugitive slave activity. Although Philadelphia's Black community lived in a free city in a free state, they faced constant threats to their personal safety and freedom. Enslavers, kidnappers, and slave catchers prowled the streets of Philadelphia in search of potential victims, violent anti-Black riots erupted in the city, and white politicians legislated to undermine Black freedom. In *Street Diplomacy*, Elliott Drago illustrates how the political and physical conflicts that arose over fugitive slave removals and the kidnappings of free Black people forced Philadelphians to confront the politics of slavery.

ELLIOTT DRAGO (PHILADELPHIA, PA) is an independent scholar.

CONSERVATIVE THOUGHT AND AMERICAN CONSTITUTIONALISM SINCE THE NEW DEAL

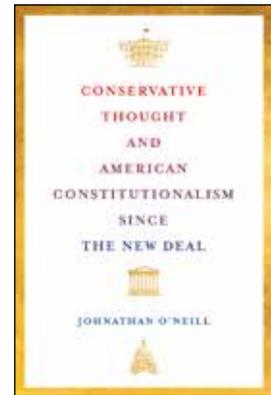

JOHNATHAN O'NEILL

An intellectual history of American conservatism since the New Deal.

The New Deal fundamentally changed the institutions of American constitutional government and, in turn, the relationship of Americans to their government. Johnathan O'Neill's *Conservative Thought and American Constitutionalism since the New Deal* examines how various types of conservative thinkers responded to this significant turning point in the second half of the twentieth century.

O'Neill identifies four fundamental transformations engendered by the New Deal: the rise of the administrative state, the erosion of federalism, the ascendance of the modern presidency, and the development of modern judicial review. Various schools of conservative thought (traditionalists, neoconservatives, libertarians, Straussians) responded to these major changes.

JOHNATHAN O'NEILL (STATESBORO, GA) is a professor of history at Georgia Southern University. He is the author of *Originalism in American Law and Politics: A Constitutional History*.

AFTER THE FLOOD—NEW IN PAPERBACK

Imagining the Global Environment in Early Modern Europe

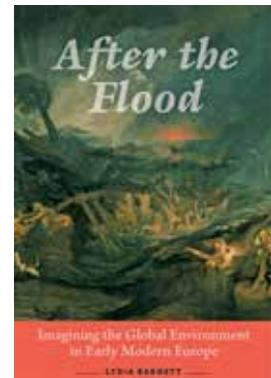

LYDIA BARNETT

How the story of Noah's Flood was central to the development of a global environmental consciousness in early modern Europe.

Many centuries before the emergence of the scientific consensus on climate change, people began to imagine the existence of a global environment: a natural system capable of changing humans and of being changed by them. In *After the Flood*, Lydia Barnett traces the history of this idea back to the early modern period, when the Scientific Revolution, the Reformations, the Little Ice Age, and the overseas expansion of European empire, religion, and commerce gave rise to new ideas about nature, humanity, and their intersecting histories.

Recovering a forgotten episode in the history of environmental thought, Barnett brings to light the crucial role of religious faith and conflict in the emergence of a global environmental consciousness. Barnett reveals how early modern earth and environmental sciences were shaped by gender, evangelism, empire, race, and nation.

LYDIA BARNETT (CHICAGO, IL) is an associate professor of history at Northwestern University.

ANIMAL TRUTH AND OTHER STORIES

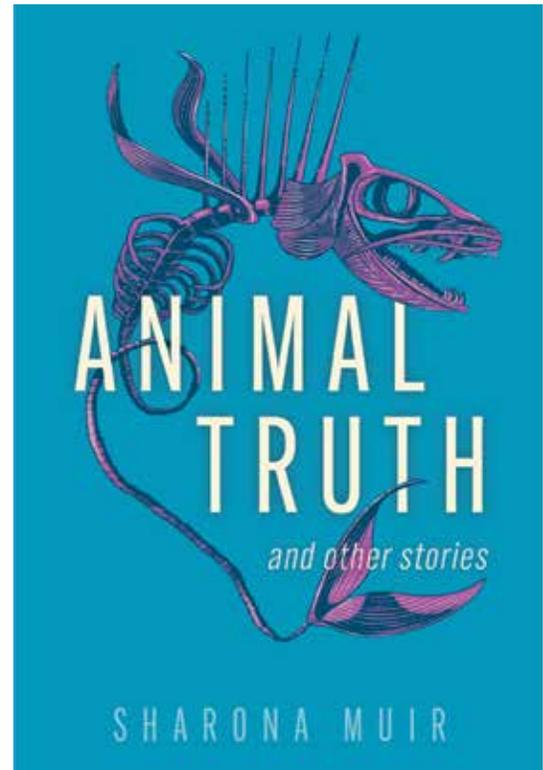

SHARONA MUIR

Animal Truth and Other Stories is a collection of eco-fabulist tales in which adventures with fantastic animals and real science lead to metamorphoses of the heart. Familiar legends, from Faust and Oedipus to werewolves and time travel, appear in radically new ways: An artist obsessed with species extinction unwittingly summons a demonic double when he creates a “banquet” featuring a baked mermaid. A brilliant woman studying a rare fish makes a soul-shattering discovery about motherhood. A time-traveling billionaire escapes his modern life only to have his heart broken by a lovely creature in Earth’s remote past.

The author of *Invisible Beasts* presents a time-bending collection of unsettling, sharp stories that straddle science and myth.

Each tale in this collection turns into gold the prickling straw of anxieties about our continued life on the planet. By turns playful, terrifying, haunting, and sensuous, these stories inspire wonder at the interwoven lives of human and nonhuman beings.

SHARONA MUIR’S (PERRYSBURG, OH) debut novel, *Invisible Beasts* was praised in *O, the Oprah Magazine* as a ‘Title to Pick Up Now’ and was a finalist for the Orion Prize. She is a recipient of the National Endowment for the Arts Fellowship in poetry; the Alfred Hodder Fellowship from Princeton University; three Ohio Arts Council Individual Excellence Awards in fiction, nonfiction, and poetry; and other awards. Muir has authored four books, including a memoir from Random House/Schocken Books and a first volume of poetry from Harper & Row. Other writing has appeared in *The New York Times*, *Granta*, *The Paris Review*, *Kenyon Review*, *Virginia Quarterly Review*, *Michigan Quarterly Review*, and numerous other periodicals.

REJOICE THE HEAD OF PAUL MCCARTNEY

ADAM BRAVER

“Sophisticated, subtle, nuanced, and very moving.”
—Rick Moody

In the fall of 1969, on Sunset Boulevard, a giant billboard advertised the newly released album, *Abbey Road*. Shortly after it appeared, Paul McCartney’s head was cut off the display, mysteriously disappearing. Set against that backdrop, *Rejoice the Head of Paul McCartney* is about more than a specific incident or snapshot of history; it is a story of people and a generation being shaped by their times. Through its ensemble cast, we see how that moment of desecrating the symbol of an era affects the lives of the characters over the course of several decades. Some characters are drawn to confronting the challenges, while others are trying to escape them. But all are affected by the specter of the missing Paul McCartney head.

ADAM BRAVER (CRANSTON, RI) is the author of seven novels. His books have been translated into French, Italian, Japanese, Turkish, and Russian.

THE TIP OF THE PYRAMID

Cultivating Community Cultural Capital

TONY DIAZ

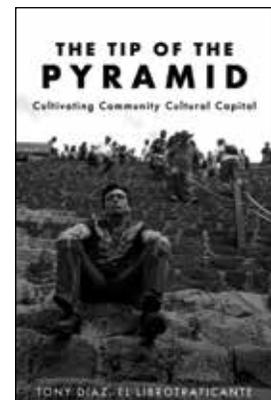

This Book was written five hundred years after the Mexica relented governance of their land to the spanish pirates who razed Our libraries and burned Our Books and Art. This Book comes twenty-five years after the creation of Nuestra Palabra: Latino Writers Having Their Say in Houston, where Our Voices and Stories were silenced and ignored. This Book is published ten years after Arizona officials enforced a ban on Mexican American Studies. These erasures—and Our resistance to them—have long themselves been erased. That ends now.

Community organizing ten years after the Librotraficante caravan

The Tip of the Pyramid renders the power of Community to shatter the generalizations, clichés, and stereotypes that sentence Us. It unpacks metaphors that are over five hundred years old. And it documents the self-empowerment of Our Gente.

As new attacks loom, *The Tip of the Pyramid* impels Our Community and allies to unite.

Writer and activist **TONY DIAZ** (HOUSTON, TX) is the author of *The Aztec Love God*. *The Tip of the Pyramid* is the first in his series on Community Organizing.

KREISKY, ISRAEL, AND JEWISH IDENTITY

DANIEL ASCHHEIM

How Austria's longest-serving chancellor's Jewishness influenced his politics and world affairs.

The personal and professional life of Bruno Kreisky, Austria's longest-serving chancellor, has been studied extensively. However, his ambiguous and complex relationship to his Jewishness, Israel, and Zionism, and how this influenced his politics and global aspirations, remains only partially researched. This book systematically and comprehensively analyzes these connections through interviews with Kreisky's contemporaries and archival material. Simultaneously, the book shows that Kreisky was among the most influential and controversial politicians since WWII.

DANIEL ASCHHEIM, PhD (CHICAGO, IL) is Deputy Consul General of Israel to the Midwest and oversees economic, cultural, press, academic, interfaith, and community outreach initiatives. Aschheim holds a PhD from the Hebrew University in Jerusalem and has an MA in European Studies and a BA in Government, Diplomacy, and Strategy.

THE AUSTRIAN SECOND REPUBLIC (CONTEMPORARY AUSTRIAN STUDIES, VOL. 31)

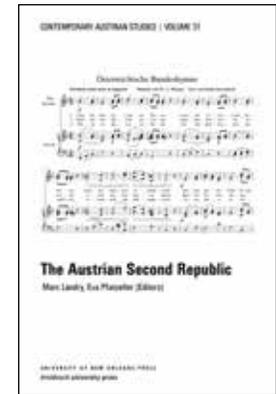

EDITED BY MARC LANDRY AND EVA PFANZELTER

Vol. 31 of Contemporary Austrian Studies gives insight into Austria's Second Republic.

Contemporary Austria remains greatly influenced by post-1945 efforts to re-establish an Austrian state and forge a new "Austrian" identity. This volume focuses on the Austrian Second Republic and seeks, in particular, to explore aspects of nation-building and state-building. It adopts a multidisciplinary perspective, bringing together insights from history, sociology, and cultural studies. With topics ranging from the role of South Tyrol in the formation of Austrian identity, national symbology, immigration, monuments, music, Austrian literature, and energy infrastructure, the volume presents a snapshot of current research on the Austrian Second Republic.

MARC LANDRY (NEW ORLEANS, LA) is an assistant professor of history and associate director of Center Austria at the University of New Orleans.

EVA PFANZELTER (INNSBRUCK, AUSTRIA) is professor and Deputy Head of the Department for Contemporary History and Deputy Head of the Research Center Digital Humanities at the University of Innsbruck.
